

Charles Sturt
University

Let's
create
a world
worth
living in

Undergraduate Guide 2022

The change the world needs sure won't come from just talking about it. At Charles Sturt University, we roll up our sleeves and turn ideas into action.

Because when we all work together...

We build technology that keeps lonely Aussies company.

We start businesses that give young winemakers a chance to grow.

We cut down the radiation in radiography.

We connect children to their culture.

And we save our native animals from the brink of extinction.

At Charles Sturt University, you get to work from day one.

Because it's not what we say that makes a difference.

It's what we do.

Yindyamarra Winhanganha

This is a Wiradjuri phrase meaning ‘the wisdom of respectfully knowing how to live well in a world worth living in’.

It's at the heart of everything we stand for here at Charles Sturt University, and it's the reason we strive to create a world worth living in.

To us, a world worth living in is a place that protects and values society's core needs. The security of our land and food. The health and education of our people. The development of technology to help us prosper. And clear and honest communication with ourselves – and each other.

Charles Sturt University was founded on a quest to meet these fundamental needs. Since day one, we've empowered people to make the world a better place. Because we believe in making a difference. When we connect people to their purpose, we make communities better. And when we make communities better, we create a world worth living in.

What does it mean to create a world worth living in?

It means finding your purpose and seeing it through to the end.

It means standing up for what you believe in.

It means meeting challenges with innovation – and a smile.

It means rolling up your sleeves and getting the job done.

It means doing your bit to make a real and lasting difference.

It means making meaningful connections.

It means not being afraid to stand up and be counted.

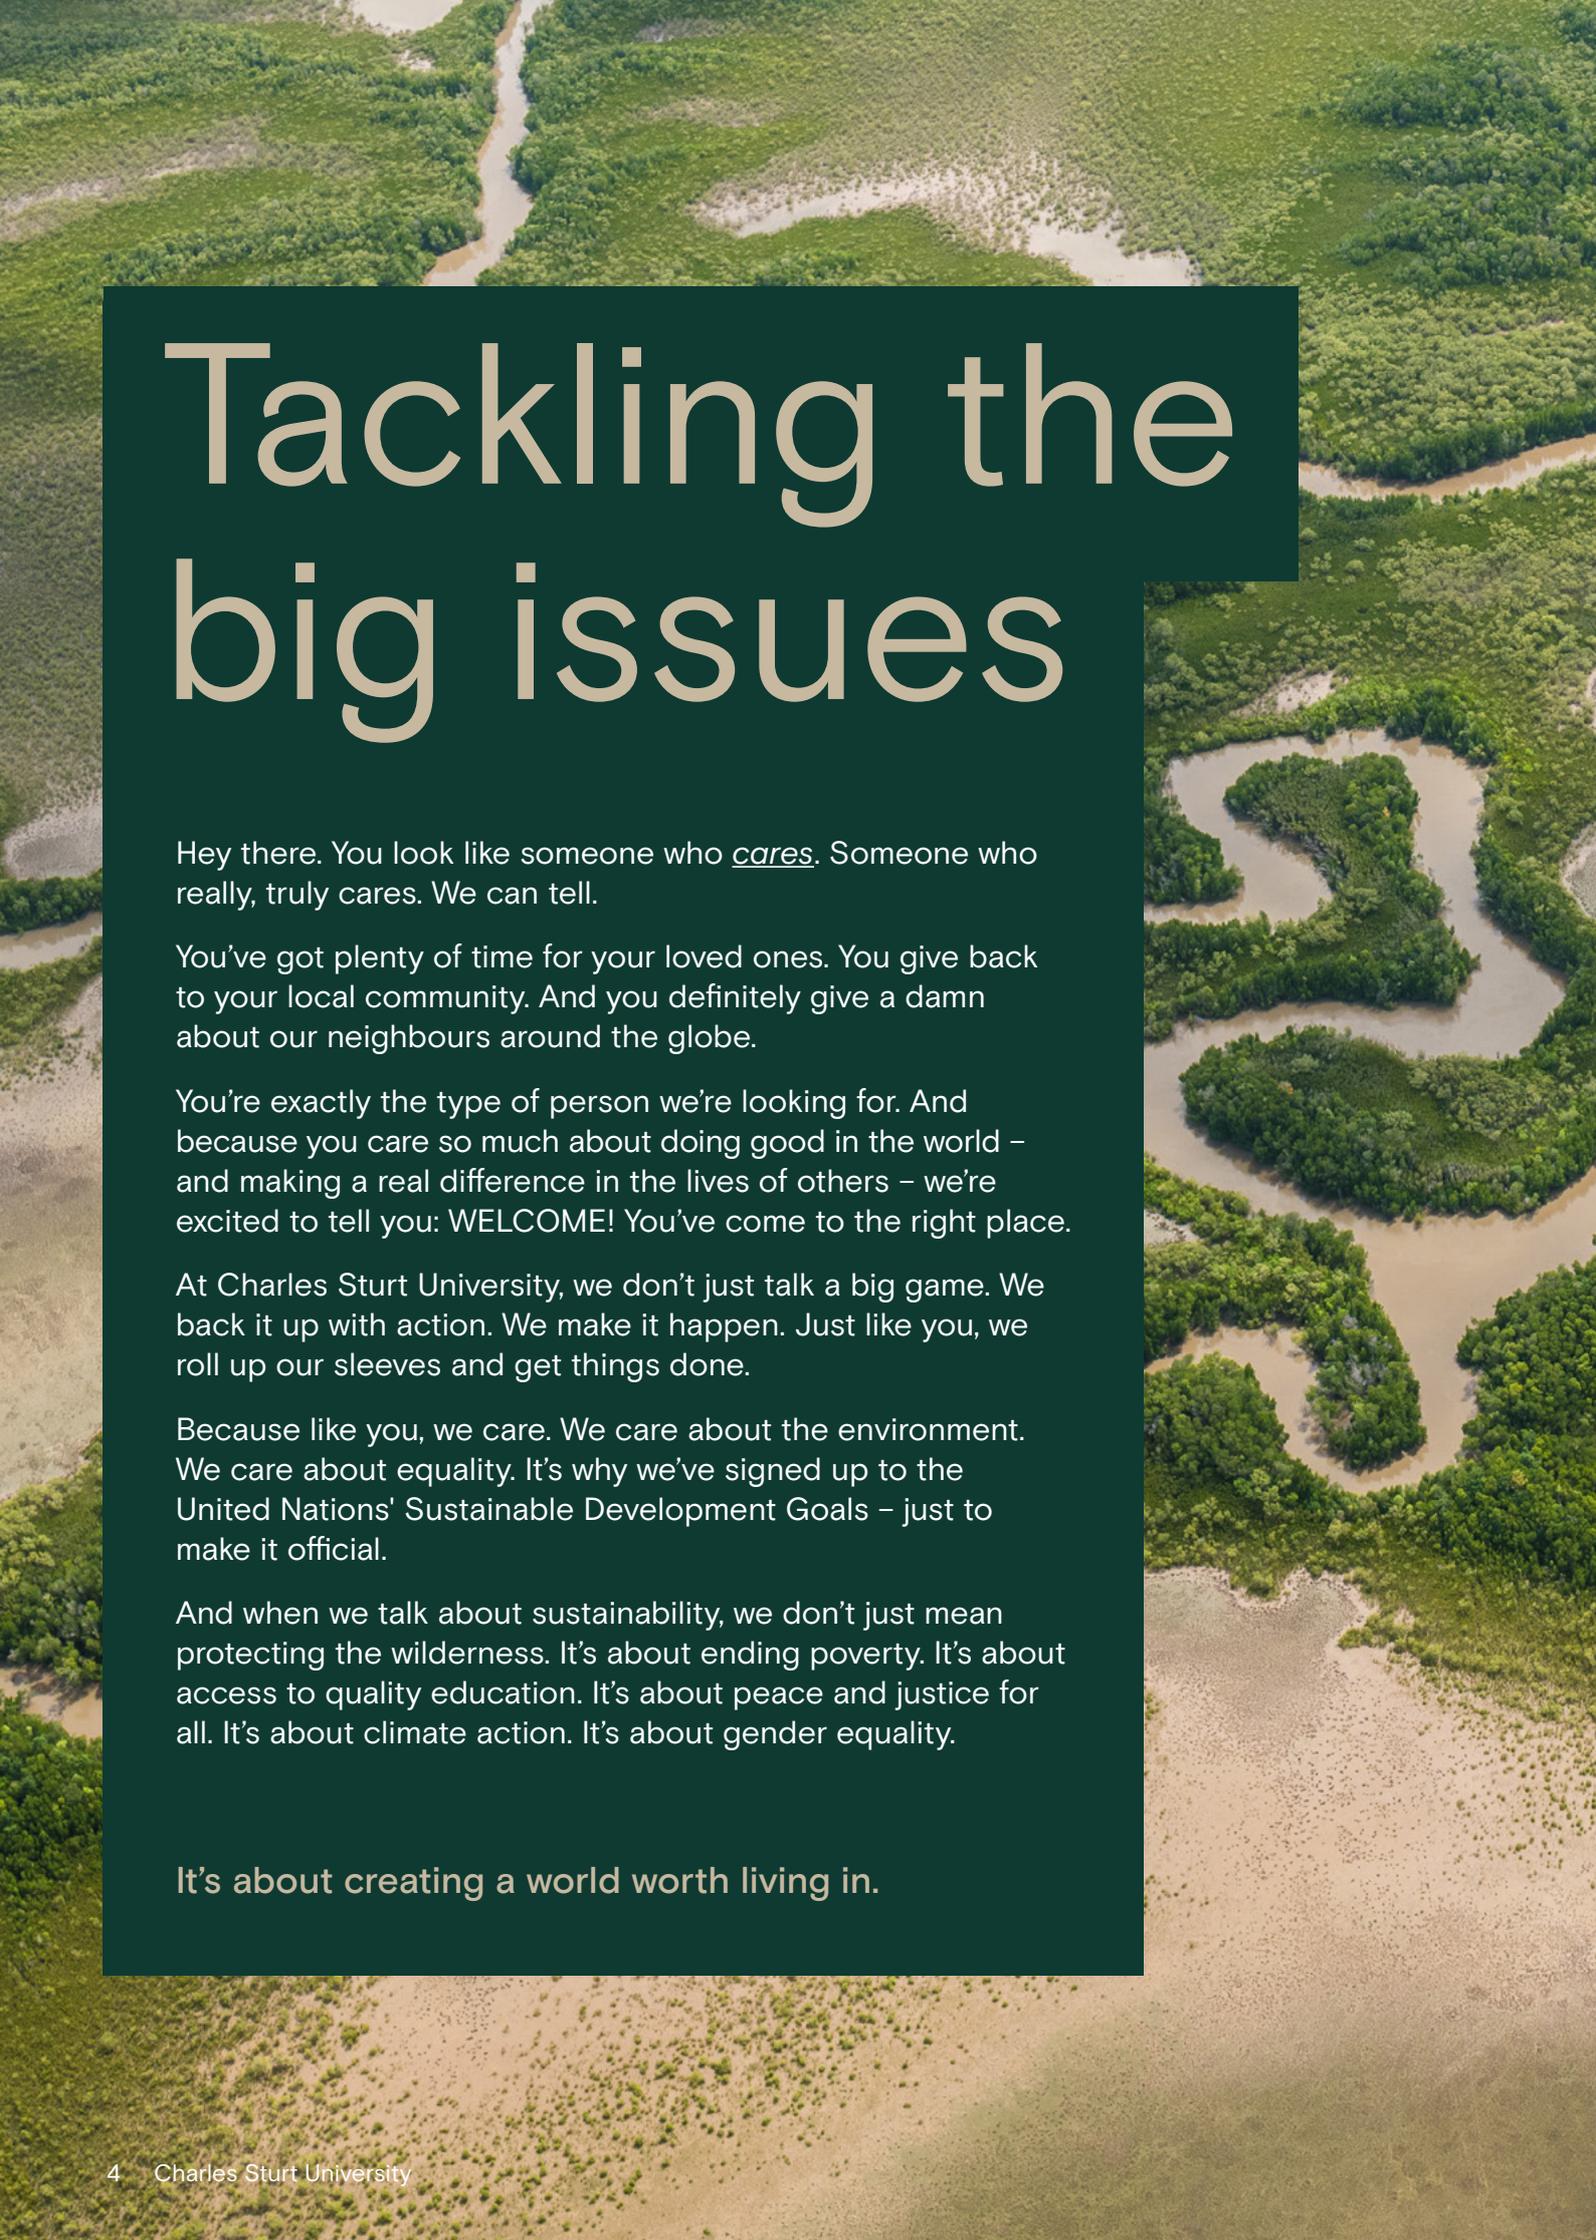

It means pushing the boundaries to make an impact.

It means never resting on your laurels when there's work to be done.

It means helping each other for the greater good.

It means shaping tomorrow – by starting today.

What does creating a world worth living in mean to you?

An aerial photograph of a river meandering through a dense, green forested area. The river is a light brown color, contrasting with the vibrant green of the trees. The landscape is flat, and the river's path is clearly visible as it winds through the terrain.

Tackling the big issues

Hey there. You look like someone who cares. Someone who really, truly cares. We can tell.

You've got plenty of time for your loved ones. You give back to your local community. And you definitely give a damn about our neighbours around the globe.

You're exactly the type of person we're looking for. And because you care so much about doing good in the world – and making a real difference in the lives of others – we're excited to tell you: WELCOME! You've come to the right place.

At Charles Sturt University, we don't just talk a big game. We back it up with action. We make it happen. Just like you, we roll up our sleeves and get things done.

Because like you, we care. We care about the environment. We care about equality. It's why we've signed up to the United Nations' Sustainable Development Goals – just to make it official.

And when we talk about sustainability, we don't just mean protecting the wilderness. It's about ending poverty. It's about access to quality education. It's about peace and justice for all. It's about climate action. It's about gender equality.

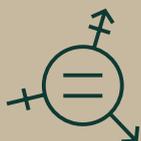

It's about creating a world worth living in.

We know that the only way to create a world worth living in is to lead by example. So when you study with Charles Sturt University, you'll make a difference too. Together, we can make the world a better place.

Sustainability is a buzzword for some organisations, but for us it's a priority. We're proud to be Australia's very first carbon neutral university. We're also in the top 70 universities worldwide for sustainable development. Plus, we've integrated sustainability issues into all our undergraduate courses, so you'll have the chance to make a real and lasting difference as well – whichever degree you choose.

If you believe that everyone should have the same opportunities regardless of gender, then you'll be happy to know that we're the world's #6 uni for gender equality. We're an Employer of Choice for Gender Equality two years running, and we received the Athena SWAN Bronze Institution Award for our contribution to women in STEM.

Climate change is one of the biggest issues facing our planet. We need to act now. As the #2 university in Australia for climate action, we're recognised for the difference we're making. When you visit us, you'll see that we've got nearly 16,000 solar panels installed across our campuses (enough to power more than 2000 homes). It's just one of the ways we're reducing the impact we have on our environment.

Our research makes a difference – and our academics contribute solutions to real-world problems. From keeping the water of the Murray-Darling River flowing and helping native animals recover from the bushfires, to fighting cyber crime and reducing medical radiation exposure – our research is having a positive impact on the world around us.

**The best bit?
We're only just getting started.
And you can be a part of it.**

Why choose Charles Sturt?

Here, you can do anything. We'll connect you with the right information, services and support to make sure you achieve everything you set out to do.

Learn more about studying with Charles Sturt

→ study.csu.edu.au

Be the grad who gets the job

Join the university with the highest graduate employment rate in Australia* – more Charles Sturt grads get jobs faster than grads from any other uni. Employers know Charles Sturt grads are skilled, confident and ready to get to work.

Learn with the experts in online study

As Australia's most experienced online university,[^] we know a bit about delivering the best online university education. More students choose to study online with us than any other uni in Australia[^] (in fact, there are around 25,000 studying online with us right now!).

Connections with industry

Our academics and teaching staff are well-connected. So when you graduate, you'll already have a wide network of industry contacts who can help you kickstart your career.

You're more than just a number

At Charles Sturt, you'll get the attention you need. With one-to-one connections with your lecturers and tutors (they'll actually know your name!) and personalised learning – you'll soon find out what sets us apart from other unis.

Fit study around your life

You have true flexibility to choose your study path. Study on campus, online – or a mix of both! If you want to take an extra subject in a session to accelerate your degree, go for it. And if you need to scale back to just one or two subjects a session, you can do that too.

We've got your back – from day one

Support isn't an 'add-on' – it's part of your experience. We'll introduce you to our support services early, and they will be there for you to use whenever you need them.

*OILT Graduate Outcomes Survey 2020
^Department of Education, Skills and Employment
Higher Education Statistics

Everything on your doorstep.

The library, Learning Commons, support services, free wi-fi, your lecturers and great coffee... it's all here for you.

When you study on campus, you get the ultimate student experience. You're in the thick of it. You're steps away from everything you need to survive – and thrive – at Charles Sturt University.

Campus life: it's exactly what you picture it to be.

Study at the heart of campus

You'll walk with your mates to lectures and tutorials. You'll get one-to-one guidance from teaching and support staff. You'll create epic memories at movie nights, live music gigs and charity events. You'll have more late-night study sessions than you can count at the library and 24-hour Learning Commons.

Get involved

Our outlook is young, progressive and enthusiastic – which aligns perfectly with our student community. When you study on campus, there are plenty of ways to get involved. You can volunteer in the local community, join a quirky club or society, help out at events, become a residential adviser, organise eco-initiatives with Charles Sturt Sustainability – and so much more.

Get hands-on

Hands-on learning is a huge part of studying on campus. You start your career from day one, gaining valuable experience in real-world settings. You'll learn in modern labs or health clinics; in simulated nursing wards, courtrooms or classrooms; out in the field in vineyards, farms or equine centres; or with industry placements in city or regional areas.

Get connected

You'll have access to our digital learning environments and online resources – via free wi-fi across the entire campus. And by studying on campus, you're also close to local organisations and businesses, so you can build your network and line up work placements, internships – even a gig for when you graduate.

When you study on campus, no two days will be the same. You could find yourself:

- heading along to a lecture to learn about new theories
- getting hands-on at a practical learning session
- catching up with your mates at a barbecue lunch for charity
- taking part in a student council meeting
- attending sports practice with your teammates.

Want to check it out for yourself? Book a campus tour and we'll show you the ropes.

Our campuses

At Charles Sturt University, we're geographically gifted. We have six campuses, and plenty of other places you can study.

Albury-Wodonga

330km to Melbourne

- Australia's first certified carbon neutral university campus
- Environmentally sustainable student accommodation and learning environments
- Community Engagement and Wellness Centre: occupational therapy, physiotherapy and podiatry facilities and clinics
- Dental and oral health clinic

The important extras

- Eat and drink
- Free parking
- Gym and sport
- Indigenous Student Centre
- Library and 24-hour Learning Commons

Bathurst

200km to Sydney

- Dental and oral health clinic
- Biochemistry, exercise science, nursing and paramedicine labs
- Media centre and 2MCE broadcasting radio station
- Television studios and editing suites
- Engineering lab

The important extras

- Eat and drink
- Free parking
- Gym and sport
- Indigenous Student Centre
- Library and 24-hour Learning Commons

Dubbo

400km to Sydney

- Dental and oral health clinic
- Nursing and clinical lab
- Interactive Learning Centre (state-of-the-art computer lab)

The important extras

- Eat and drink
- Free parking
- Gym and sport
- Indigenous Student Centre
- Library and 24-hour Learning Commons

Our other locations

Charles Sturt Study Centres in Brisbane, Melbourne and Sydney.

A centre in Goulburn for policing students.

A Regional University Study Centre in Wangaratta for combined TAFE and Charles Sturt study.

Study locations in Canberra and Parramatta for theology students.

Partner locations for selected courses in Crows Nest, Canberra, Chadstone and Muresk.

Orange

250km to Sydney

- Chemistry, pharmacy, physiotherapy and rehabilitation science labs
- Dental and oral health clinic
- Medical learning facilities: anatomy teaching laboratory, simulation hospital wards and ultrasound room

The important extras

- Eat and drink
- Free parking
- Gym and sport
- Indigenous Student Centre
- Library and 24-hour Learning Commons

Live where you learn

Albury–Wodonga | Bathurst | Dubbo | Orange
Port Macquarie | Wagga Wagga

Have you ever met a group of people you instantly connected with? They just get you. And you get them.

Well, that's exactly what happens when you live on campus at Charles Sturt University. You make lifelong friends.

You'll find that everyone is in the same boat, adapting to uni life for the first time, and navigating a whole new world. You'll bond over the highs and lows. You'll make lasting memories.

It's a powerful experience to share together.

We have accommodation on all six campuses, offering the laid-back lifestyle of country living – with urban convenience.

- Guaranteed room for all first-year students.*
- All-inclusive costs – no extra bills to worry about.
- No bond required.
- Fully furnished rooms.
- Wi-fi included at no extra cost.
- Choose a catering package for some or all of your meals.

Plus, we have a dedicated team to make sure your experience living on campus is everything you hope it will be. Our Residence Life team is there to support you whenever you need it. To us, you're family. And that's the way we like it.

→ accommodation.csu.edu.au

*Make sure you check out the first-year student guarantee terms and conditions.

→ accommodation.csu.edu.au/our-rooms/first-year-student

Living on campus means you'll have everything you need on your doorstep – and be fully supported as you take your first steps on your uni journey. We've got accommodation options to suit all lifestyles.

Our accommodation options are all-inclusive, which means everything is covered in your fees, including:

- cleaning
- dedicated residential support team
- dedicated study spaces
- fully furnished bedrooms, living areas and common spaces
- internet access
- maintenance
- parking
- security
- utilities
- washing machines and dryers.

We can also take the stress out of cooking, with food outlets and meal plans available on most campuses.

And compared to a big city, the cheaper cost of regional living means more money stays in your pocket.

Albury-Wodonga

Rooms from \$180 per week

Orange

Rooms from \$155 per week

Bathurst

Rooms from \$180 per week

Port Macquarie

Rooms from \$200 per week

Dubbo

Rooms from \$180 per week

Wagga Wagga

Rooms from \$165 per week

Study online

Don't live near a uni campus? Holding down a full-time job? Caring for family? Whatever your situation – we get that study isn't your only commitment. That's why we have more than 70 courses that can be studied online.

So you don't need to worry about fitting study into your already busy schedule. We make things so flexible that study just slots right into your life – at a time and place that's convenient for you.

We understand that as an online student you have different needs to students studying on campus. And we want you to know that just because you're studying online, it doesn't mean you're studying alone. We make sure that you get the support you need. It's tailored. It's useful. And it will make a big difference to your success as an online student.

We also have online learning advisers available every day (yep, you heard right – seven days a week) until 7pm. You can reach them by phone, email, Skype or online chat.

Learn practical skills at residential schools

Studying online but still keen to develop your hands-on skills? Some online courses include short, intensive learning sessions called residential schools. Res schools are a chance for you to:

- gain hands-on skills
- use our learning facilities (like labs, simulation centres and clinics)
- get personalised, one-to-one teaching
- meet your fellow students.

You can also experience living on campus with our affordable accommodation options. And we have grants available to help pay for the costs of coming along to a res school.

You're welcome on campus anytime

Studying online and live near one of our campuses? Don't forget that you can come onsite at any time! You can use the library and Learning Commons, chat to support and teaching staff in person – and you might even be able to sit in on a lecture or two! You can also organise catch-ups with your classmates at our cafés and dining halls.

→ study.csu.edu.au/online

**Australia's most experienced
online university.**

More students choose to study
online with Charles Sturt than
any other uni in the country.*

*Department of Education, Skills and Employment Higher Education Statistics

Online study support

We get that studying online is a different experience to studying on campus. And that's why we have a set of support services that are tailored to your needs as an online student.

Everything you need at the click of a mouse

When you study online with Charles Sturt University, everything you need is there at the click of a mouse. Lectures, tutorials, assessments, resources, community spaces. Plus, our extensive digital library is available 24/7, with plenty of online resources and how-to guides to help you find what you need. We've even got a dedicated YouTube channel for all your library learning know-how. And if you need any books sent to you, we'll post them out free of charge.

Specialised support – however you want to access it

You can reach out online (email, Skype or live chat), over the phone or in person on any of our campuses. Studying online with Charles Sturt University means you have a whole range of study support at your fingertips. We have dedicated online learning advisers available every day until 7pm. Our Study Skills team are also here to help you with the nuts and bolts of study – from researching topics through writing assignments to referencing papers. And with 24/7 IT support, you'll never have to stress about tech issues.

Build genuine connections with academics, classmates and industry

Just because you're studying online doesn't mean you're studying alone. Far from it. At Charles Sturt University, you can join dedicated course forums and Facebook groups to connect with your classmates and academics. Jump into an online hangout to ask questions, collaborate or just shoot the breeze. Attend local get-togethers and come on campus to use any of the facilities – library, gym, childcare – if you're nearby. We'll give you every opportunity to build the deep connections that are central to your study. Connections with your tutors and fellow students, and with industry.

You won't have to stress about tech issues!

We have 24/7 IT support available to all students.

"This program taught me how important soft skills are – and that there are always different pathways into university. The residential retreat was an experience that I'll never forget. It gave me a look into what living on campus will be like. I also attended several other events and met so many people who I'm still friends with today. Being able to meet people before Orientation made everything so much easier and gave me so much more confidence."

Jessica Lightfoot

Have you got the Charles Sturt Advantage?

We've changed the game – and the way you can apply for an early unconditional offer to study with us.

We get that Year 12 is a big year. Massive even. There's so much pressure placed on Year 12 students.

Study hard. Do well in your exams. Achieve a sky-high ATAR. Go to uni. Land your dream job.

The thing is... we know that some people have strengths that sit outside the world of academia. So we're looking for those special soft skills – skills that might not always be reflected in your academic or exam results.

Soft skills are the skills of the future

But what exactly are soft skills? They're skills like emotional intelligence, collaboration and communication skills, resilience and a commitment to creating a world worth living in. They're valued by employers and help you excel – because they're important for any job, in any industry.

We value these skills and want to reward you for having these special qualities. That's why we're changing the way you can apply for an early offer to Charles Sturt University.

Take advantage of our early offer program

If you're successful, you'll unlock a world of possibilities. Not only will you receive an unconditional study offer before you sit your exams, you'll also become part of an exclusive program that will support you as you become an official Charles Sturt University student. From email tips and advice to exclusive on-campus events, you'll know we've got your back all the way.

Think you've got what it takes?

Register online to get all the details straight to your inbox. You'll be the first to know when applications open.

→ csu.edu.au/advantage

Admission pathways

Admission pathway courses

Things didn't quite go to plan and you didn't get into the course you were after? Don't stress. We've got two courses that can prepare you for study and get you where you want to go. You'll complete subjects focused on things like research and writing skills, maths and stats, as well as specific subjects related to the degree you want to move into.

Diploma of General Studies

If you're looking for a longer on-campus experience to get you prepped for study, the Diploma of General Studies is for you. You'll study for one year, full-time (on campus or online), and this course will give you guaranteed entry into most of our courses, including education, creative industries, computer science and IT degrees.

After completing the Diploma of General Studies, you'll have:

- credit for up to four subjects in a bachelor's degree
- a Diploma of General Studies qualification.

Charles Sturt University Pathway

If flexibility is important to you, the Charles Sturt University Pathway course will be golden.

You can study on campus or online. You can knock the course over in 14 weeks full-time, or you progress part-time over 12 months. The choice is yours! Plus, you'll get guaranteed entry into most of our bachelor's degrees once you successfully complete the course.

→ study.csu.edu.au/pathways

Indigenous Access Program

If you're a First Nations student looking to get a uni degree, our Indigenous Access Program (IAP) will help you get there. You'll get personalised guidance, study advice and a uni prep plan to help you succeed.

When you complete the program, you're guaranteed entry into a range of undergraduate courses. On top of that, students who complete the IAP are more likely to excel in their degree.

The IAP isn't just for school leavers. It's for anyone looking to take their first step into uni study.

→ study.csu.edu.au/IAP

Study Link

We want you to succeed at uni from day one. That's why we created Study Link.

Study Link offers short, self-paced subjects that get you ready for your degree – whatever you're studying. Plus, they're 100 per cent free for almost all Australian residents.

Delivered online with support from a subject coordinator, Study Link subjects don't count towards your degree – so there's no pressure. They're here to help you fill knowledge gaps, enhance skills and build confidence in areas like writing, maths, stats and science.

When you accept your offer to Charles Sturt University, we'll enrol you in the Introduction to Online Learning subject. You'll learn all about our digital learning environment so you can start on the right foot.

→ csu.edu.au/studylink

TAFE/VET

Have you completed a TAFE/VET Diploma, Advanced Diploma or Tertiary Preparation Certificate? You could take your learning to the next level with Charles Sturt University. You're eligible for guaranteed entry into most undergrad courses. What's more, you could receive credit for your TAFE/VET subjects towards your degree – meaning you can graduate sooner.

→ study.csu.edu.au/pathways

Other ways to open doors

Knowledge is power

You can get credit for previous uni or TAFE/VET study with our Recognition of Prior Learning program.

→ study.csu.edu.au/rpl

Who said sports and study don't mix?

Our Elite Athlete Program will help you balance your sports and study, with flexible study schedules and a dedicated support team.

→ study.csu.edu.au/elite-athlete

A homegrown advantage

Have you been completing high school in a regional area? We'll automatically adjust your selection rank by five points.

Hardship doesn't mean it's all over

If you had a setback during your school studies (like an illness or financial, personal or employment issues), we can adjust your selection rank.

Play to your strengths

If you performed well in high school subjects related to your preferred course, we can adjust your selection rank.

School leaver - your path to uni

In Year 12 and wondering how you're going to make it to uni?

Don't stress, at Charles Sturt we have plenty of admission pathways. There'll be at least one that's right for you.

 Hint: You can apply for both SRS and the Charles Sturt Advantage early offer program!

 Hint: If you're completing high school in a regional area we'll adjust your selection rank by five points.*

*not applicable to the Doctor of Medicine.

 Hint: If you are an elite athlete or performer, you may be eligible for special consideration for entry.

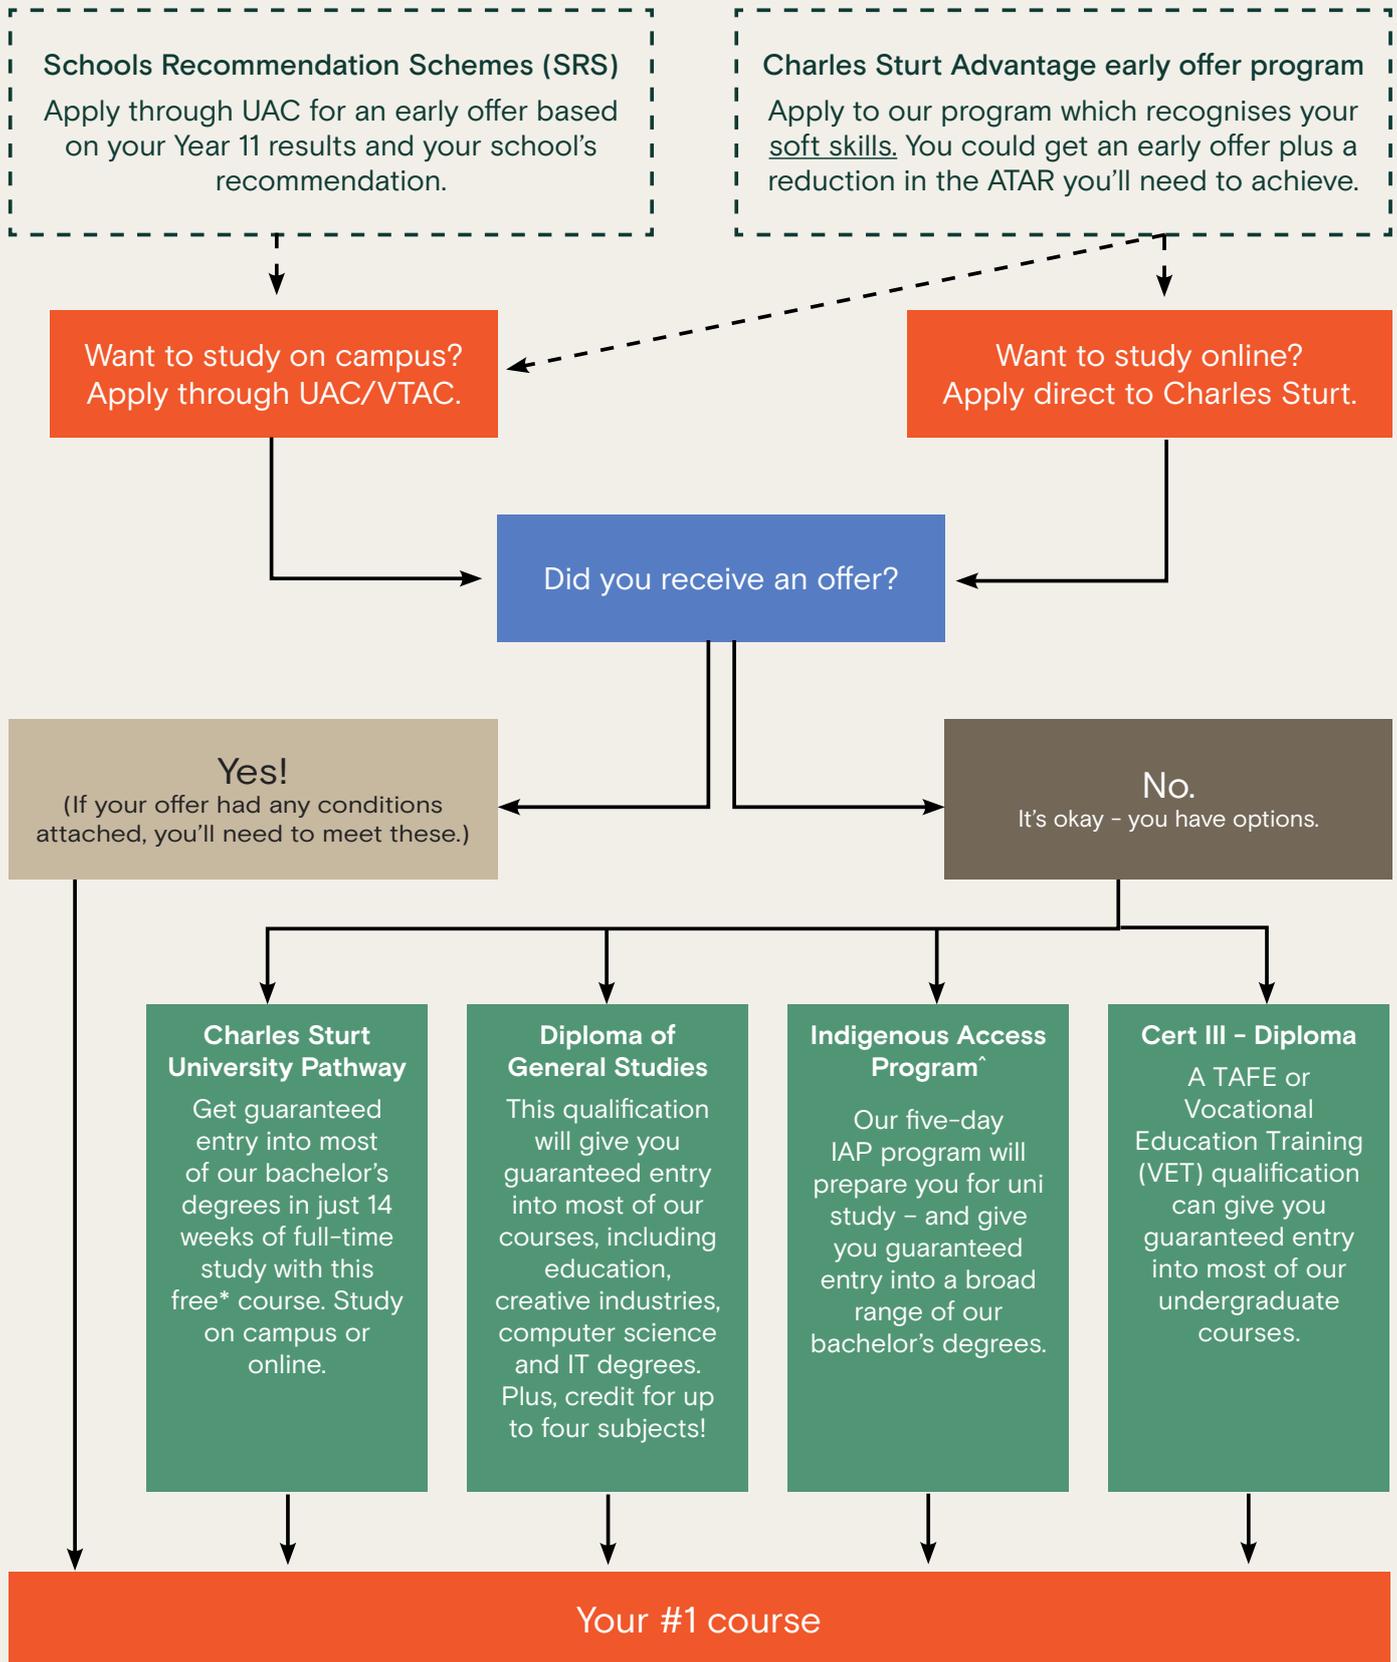

Want to chat through your options?
Book a one-to-one consult

→ study.csu.edu.au/consult

*The Charles Sturt University Pathway course is free to all domestic students (not available to international students).

^You can also apply direct to us via the IAP for guaranteed entry.

Non-school leaver – your path to uni

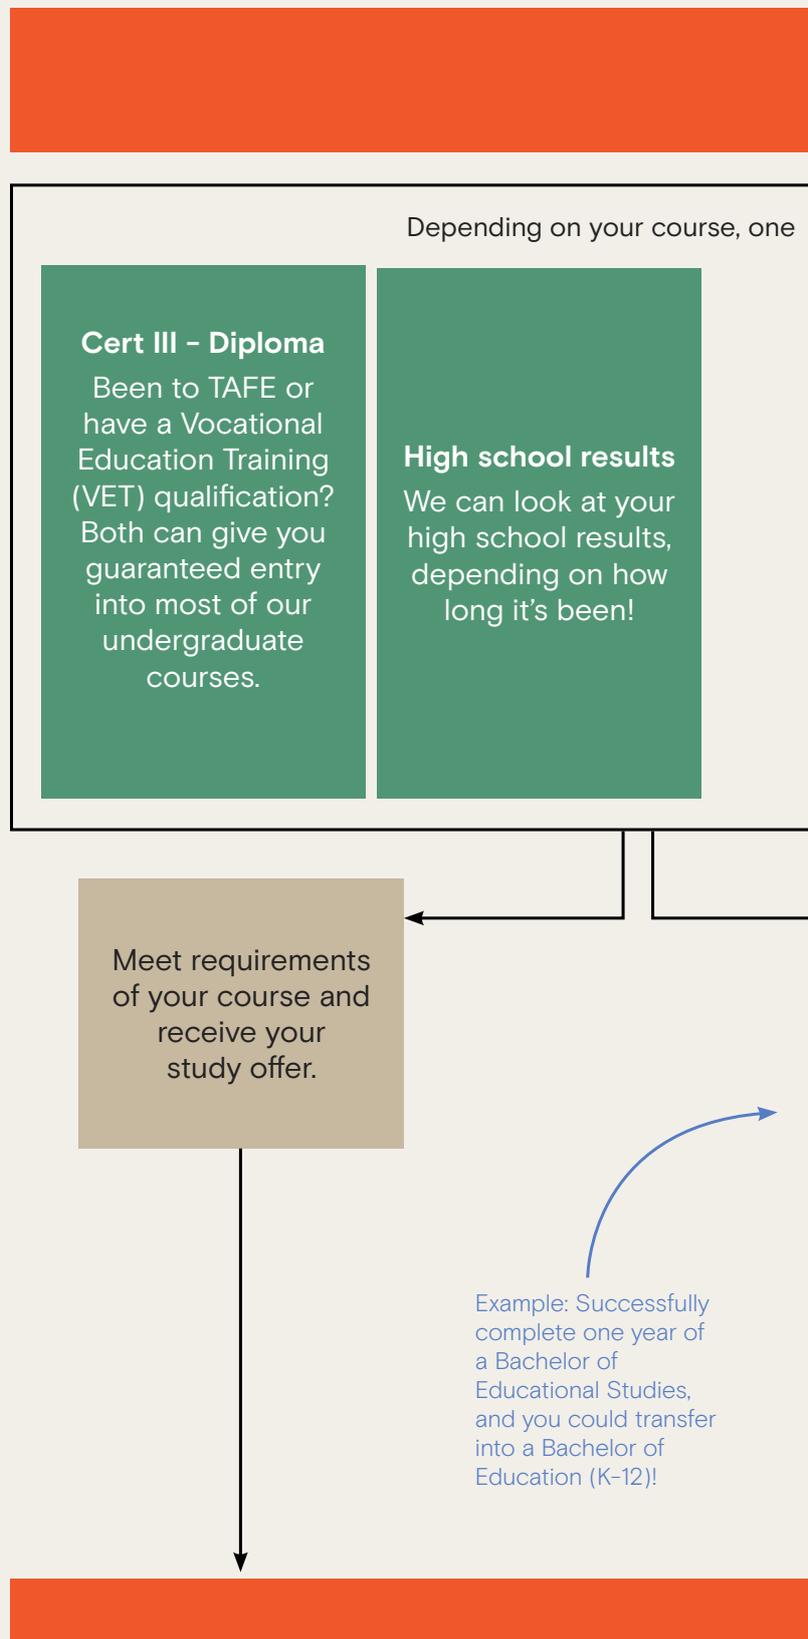

Finished high school a few years ago? There are lots of ways to show us you have what it takes.

 Hint: If you have done any tertiary study, you could get credit towards your degree.

Want to chat through your options?
Book a one-to-one consult

→ study.csu.edu.au/consult

*The Charles Sturt University Pathway course is free to all domestic students (not available to international students).

Want to study online or on campus?

Apply direct to Charles Sturt – your online application will take just 15 minutes to complete!

or more of the following could show your eligibility for an offer. (Check [course pages](#) for specific details)

Uni studies

Previous study with Charles Sturt, or another university, can net you a study offer – and potentially, credit.

Work experience

Your previous work experience may help you gain entry into your course.

Special Tertiary Admissions Test (STAT)

If you've sat a STAT test, we can use your results to assess your eligibility for a Charles Sturt course.

Charles Sturt Advtange early offer program

Show us your soft skills and you could get an offer to a degree.

Don't quite meet requirements for your #1 course. Don't stress – there are other ways in!

General degree

We offer some degrees with lower admission requirements that allow you to start at uni then transfer to your #1 course.

Single subject study

Studied a single subject with Charles Sturt? You've taken your first step into your degree!

Diploma of General Studies

This qualification will give you guaranteed entry into most of our courses, including education, creative industries, computer science and IT degrees. Plus, credit for up to four subjects!

Charles Sturt University Pathway

If you complete our free* 14 week full-time study course, you'll get guaranteed entry into most of our bachelor's degrees.

Your #1 course

Scholarships: don't rule yourself out

Did you know we offer more than \$3m in scholarships at Charles Sturt University?

We know that the cost of coming to university can be a deal breaker in deciding to study... but it doesn't need to be that way.

At Charles Sturt University, we have more than \$3 million in scholarships that can help you get to university.

And the good news is you're just the person we're looking to support. We're looking for people with a passion to create a world worth living in to join the Charles Sturt community. People who are prepared to roll up their sleeves and give it their all. People who want to put in what it takes to make a real difference. People just like you.

Don't rule yourself out.

Think you need to be a genius to get a scholarship? Think again. Scholarships have all sorts of criteria and there are so many that you will qualify for. All you need to do is apply. For as many as you like.

Trust us, it's worth your while.

Our advice to you

**Make sure you're in the running by applying!
Study the criteria and try to tick all the boxes.
The closer you get to the criteria – the higher your chance of success!**

Don't assume financial hardship doesn't apply to you. If you're finding it hard to provide for yourself or your family while studying – you're experiencing financial hardship. The secret is to tell us why it's tough.

→ study.csu.edu.au/scholarships

Fees and help with costs

Your course fees will depend on the number of subjects you enrol in and the course you're studying.

For domestic students, fees per 8-point subject typically range from around \$800 to \$1300. Fees for international students differ.

If you're an Australian citizen or a New Zealand Special Category Visa holder, you'll likely be given a Commonwealth supported place, and benefit from the HECS-HELP scheme.

How HECS-HELP works

1. When you enrol, you indicate that you want to pay all or part of your fees via HECS-HELP (you'll need a tax file number, but that's easy to get).
2. The government pays your fees and registers them against your tax file number.
3. You pay the balance back through deductions in your pay when you start working. You can choose to do so at any time, but it is only required once you earn above a certain amount. In 2020 the threshold is \$45,881.

→ study.csu.edu.au/fees

Did you know?

We have a financial support team that can help with budgeting, planning and applying for loans, and programs to help you find a part-time job if you want one.

We've got your back

As soon as you accept an offer to study with Charles Sturt University, we've got your back. We have support available every step of the way – however you choose to study.

Study support

Our support team is dedicated to helping you succeed, in person, online or over the phone. We're available seven days a week, and it's free. We'll help you when it suits, including in the evenings and on the weekends.

Student Central

This is your first point of contact as an enrolled Charles Sturt University student. If you need a hand with your subject enrolment, study skills, accommodation or finances, or you're just not sure who to ask about something – this is the place to go.

Careers advice

From researching your career options and finding job opportunities, to help working on your résumé, application letters and interview techniques – our Career Development Service will help you land your dream job.

Spiritual support

Need to talk to someone about life's most complex questions? We can connect you with religious and spiritual support and access to community resources and services, both on and off campus.

Equity support

Our Student Equity Office provides advice and support to ensure all our students have the same opportunities to succeed, no matter what their circumstances.

Student wellbeing

Healthy students are happy students. We have a great range of services and information available to keep you in top physical, mental and emotional shape.

Disability support

If you're a student with a disability, our Disability Service will provide advice, support and adjustments if needed. That way you can participate 100 per cent in your studies.

→ study.csu.edu.au/support

Take your study around the world

We're a regional uni with a global outlook. We believe study should set you free.

Really.

That's why we have so many international study opportunities you can explore during your degree.

With Charles Sturt Global, you can build your skills, experience another culture, enhance your résumé and meet new people – all while having an epic time!

- Study abroad for a session or two.
- Volunteer or intern in a new environment.
- Take a study tour during your uni holidays.
- Complete a work placement in another country.

Studying online?

Just because you're studying online, doesn't mean you're staying put. Our overseas opportunities are available for everyone – whether you're studying on campus or online.

→ study.csu.edu.au/overseas

Events

 Your safety is our number one priority. All in-person events will be run in line with current government COVID-19 guidelines and restrictions.

Open Day

It's one thing to hear about what going to uni is like – but it's completely different to experience it for yourself. And that's what Open Day is all about. Giving you the chance to discover that #realunilife. We host both on-campus and virtual Open Days, so no matter your location, you'll have the opportunity to immerse yourself in the experience.

On the day, we'll answer all your questions about studying with Charles Sturt – courses, study modes, living on campus, support services (and everything in between). You'll also have the chance to jump on a campus tour – both on campus and online – and check out our state-of-the-art facilities and accommodation.

- Albury-Wodonga – Sunday 15 August
- Bathurst – Sunday 22 August
- Dubbo – Saturday 4 September
- Orange – Sunday 29 August
- Port Macquarie – Sunday 1 August
- Wagga Wagga – Sunday 8 August
- Virtual – Sunday 20 and Tuesday 22 June

→ csu.edu.au/openday

Explore Day

Are you ready to get hands-on and explore your future career? If you're in Year 10, 11 or 12 – this one is for you.

Explore Day is where you'll take your first steps into uni life – finding the right course for you and learning about life as a uni student. You'll get to chat to current students about their experience, as well as our expert teaching staff who can answer any questions you might have about their study area. There will be plenty of practical (aka fun) activities for you to dive into, including hands-on workshops and interactive tours.

- Albury-Wodonga – Tuesday 30 March
- Bathurst – Tuesday 16 March
- Dubbo – Wednesday 31 March
- Orange – Wednesday 17 March
- Port Macquarie – Wednesday 10 March
- Wagga Wagga – Tuesday 23 March

→ study.csu.edu.au/exploreday

Come along to a careers expo

You'll also find our student ambassadors at lots of expos and events, including:

- VCE and Careers Expo – Caulfield Racecourse, Melbourne, 29 April–2 May
- HSC and Careers Expo – Hordern Pavilion, Sydney, 3–6 June
- Western Sydney Careers Expo – Sydney Showground, 24–27 June
- Canberra CareersXpo – Exhibition Park, Canberra, 4–5 August

Book a personalised campus tour

Get a feel for all things Charles Sturt on a campus tour tailored to your interests. Check out our practical learning facilities, like studios, labs, simulators and clinics. Explore our many accommodation options. Throw in the natural beauty of our regional campuses and we think you'll really like what you see.

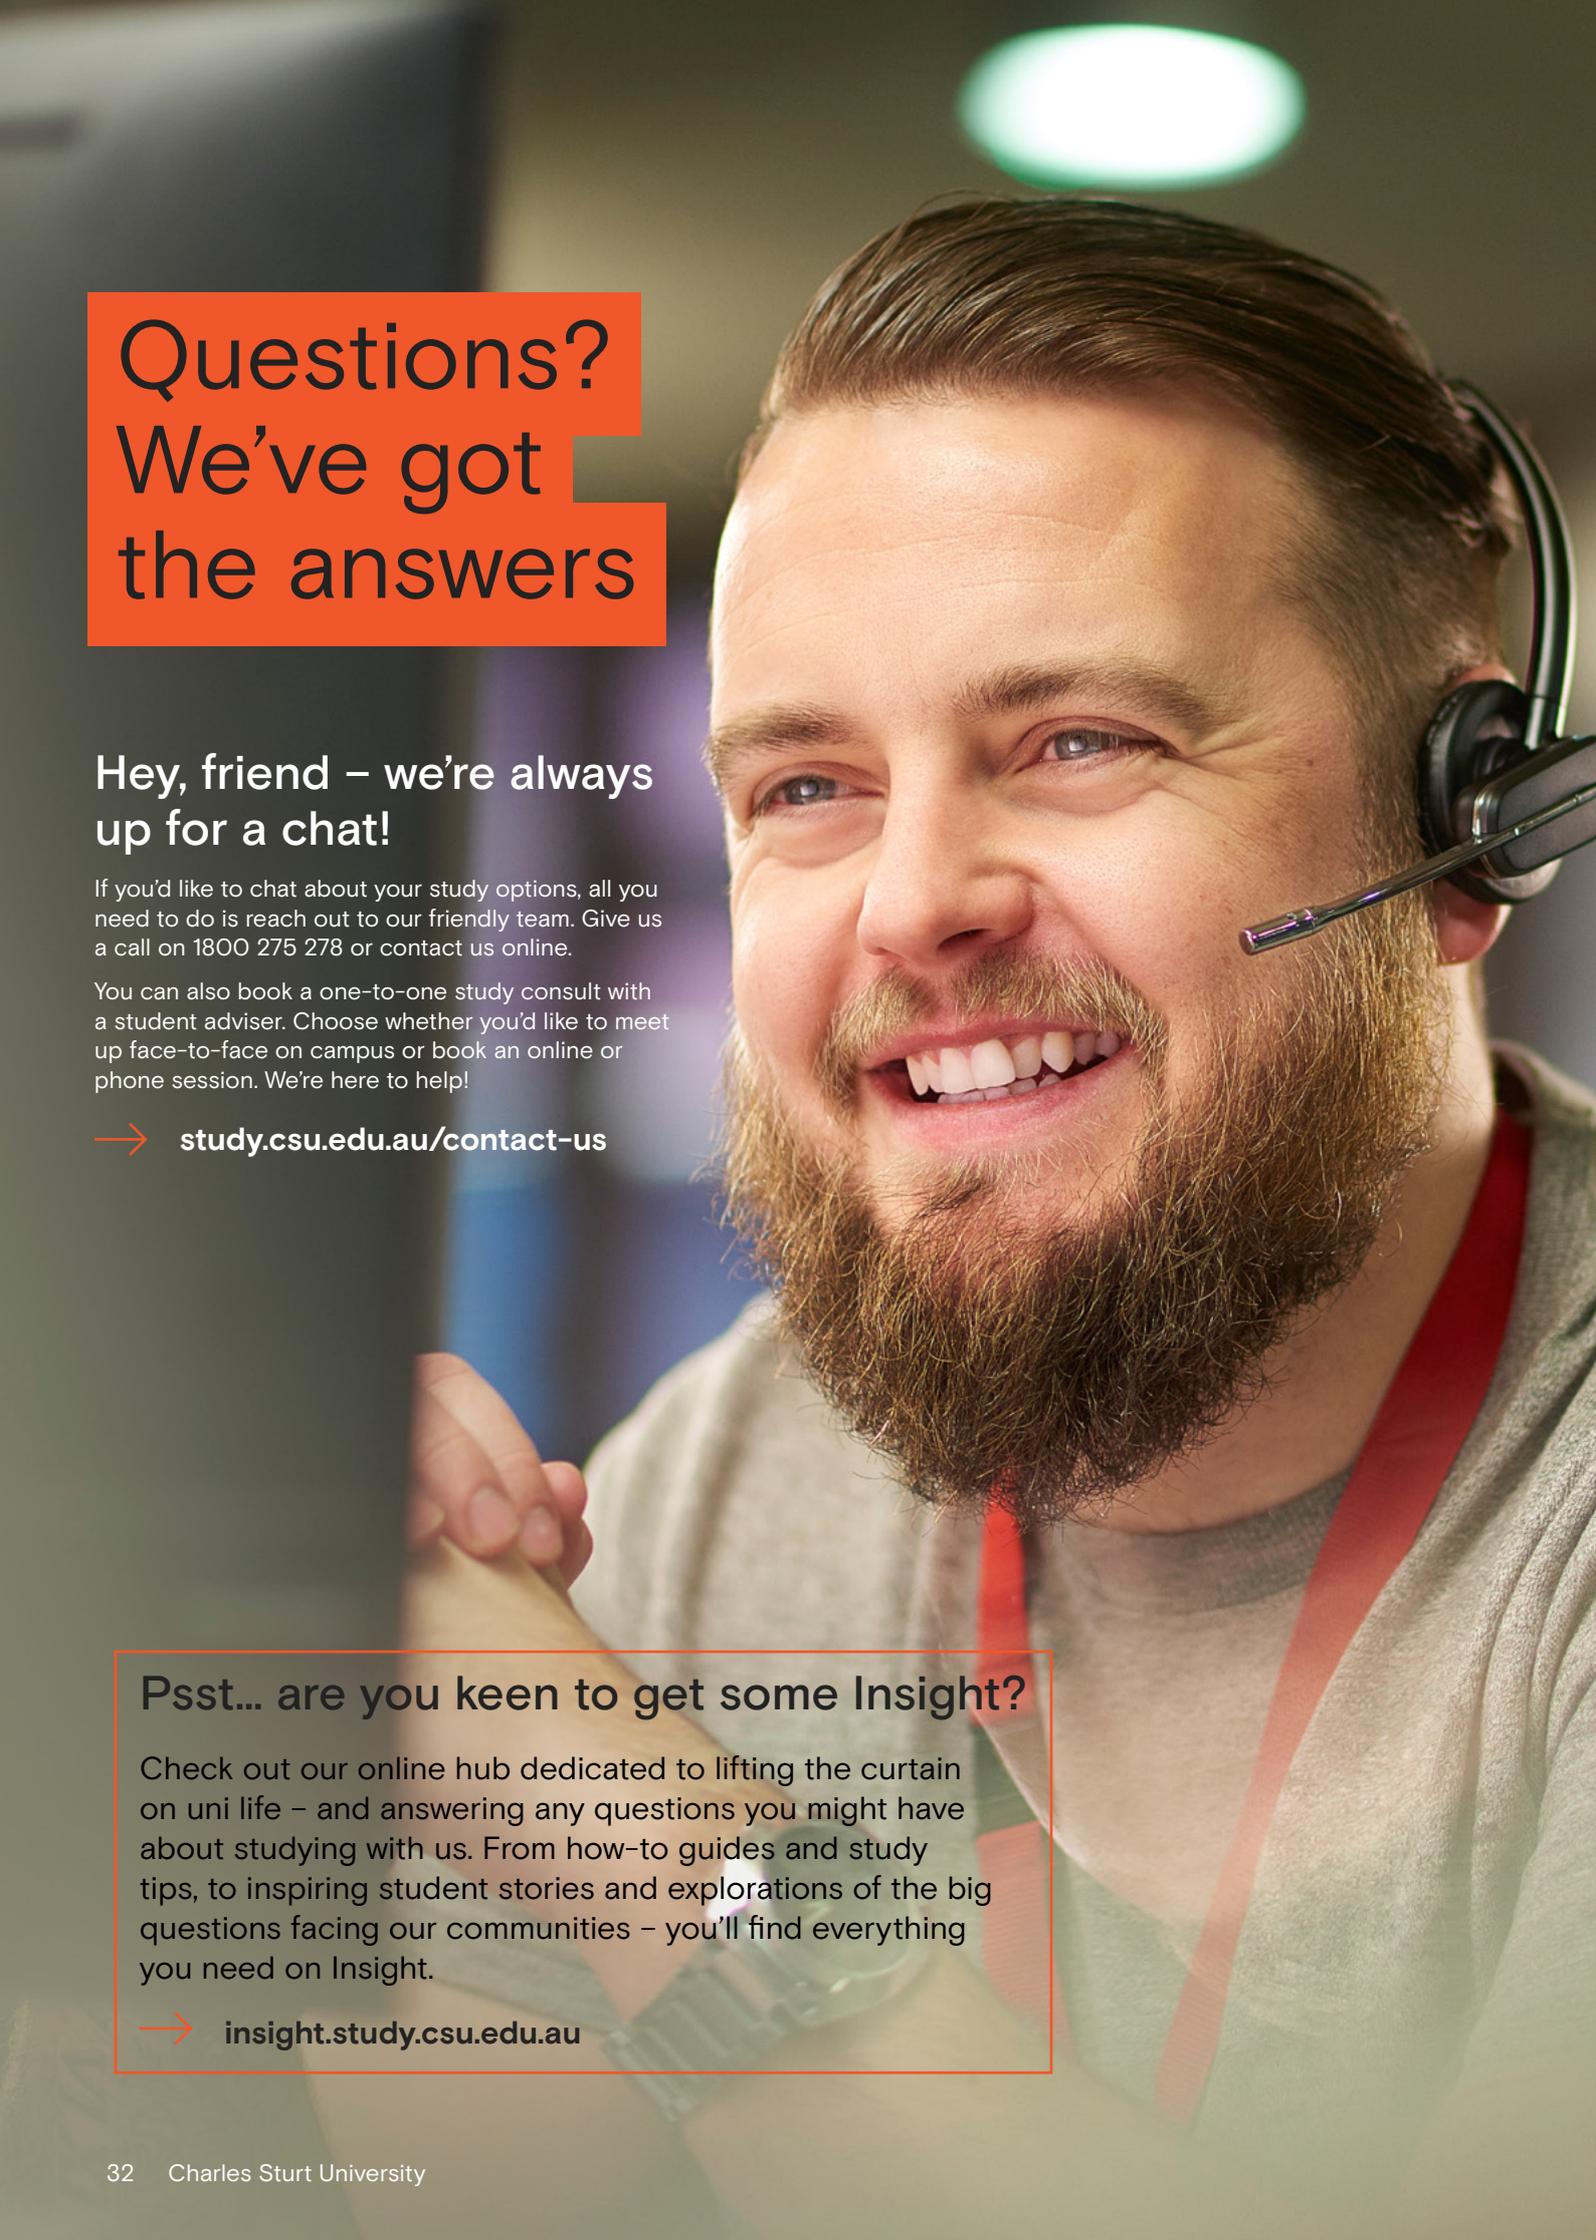

We run socially distanced campus tours every day of the year. Book your spot online or call us on 1800 275 278.

→ study.csu.edu.au/contact-us

Stay in the loop

We run lots of in-person and online events throughout the year. Keep up to date with the latest event information on our website.

→ study.csu.edu.au/events

Questions? We've got the answers

Hey, friend – we're always up for a chat!

If you'd like to chat about your study options, all you need to do is reach out to our friendly team. Give us a call on 1800 275 278 or contact us online.

You can also book a one-to-one study consult with a student adviser. Choose whether you'd like to meet up face-to-face on campus or book an online or phone session. We're here to help!

→ study.csu.edu.au/contact-us

Psst... are you keen to get some Insight?

Check out our online hub dedicated to lifting the curtain on uni life – and answering any questions you might have about studying with us. From how-to guides and study tips, to inspiring student stories and explorations of the big questions facing our communities – you'll find everything you need on Insight.

Agricultural and wine sciences

Agriculture. Working – and taking care of – the land. It's the backbone of our nation's economy. And as the farming, agriculture and wine industries increasingly harness technology to progress – the demand for agriculture professionals grows. And it's people just like you who can push things forward.

At Charles Sturt University, we have a rich history with the land. It's in our blood. As one of the largest providers of agricultural, horticultural and wine science education in Australia, our degrees tap into this longstanding connection. So you can become a thinker and doer in tomorrow's agricultural landscape.

Agriculture is also about much more than working on the land. You don't have to have grown up with mud on your boots to make a difference in this industry – that's essential for the sustainable future of the planet. From finance, sales and marketing to science, media and information technology – your career can be as broad as the blue skies above.

So, are you ready to get to work?

A white shield-shaped graphic on a dark green background. Inside the shield, the text reads: "#1 in NSW for agriculture grads who get jobs". Below the text is a small icon of a wheat stalk and a wine glass. At the bottom of the shield, it says "Reap the rewards. 86% of our ag students get full-time jobs within 4 months of graduating." A small, curved text at the bottom right of the shield reads "*Good Universities Guide 2020/21".

Facilities

Winery

Explore the science of winemaking using equipment and wines in our purpose-built winery. Get hands-on with wines produced by our expert team and help move Australia's wine industry into the future.

Glasshouse facilities

Find out how crops grow with specialist mechanical, lighting and humidity systems in our modern glasshouses.

National Life Sciences Hub (NaLSH)

Home to our leading research programs into biology, agriculture and the environment, our purpose-built facilities include four large research laboratory spaces and a phytotron building housing controlled environment and growth chambers.

On-campus farm

With Charles Sturt, you'll have access to 1400 hectares of prime mixed farming land and agricultural research institutions – so you can gain real-world experience in livestock, cropping, irrigation and horticultural systems.

Rhizolysimeter

Investigate root growth using the most sophisticated rhizolysimeter in the southern hemisphere. This state-of-the-art facility simulates crop growth in order to investigate its impact on dryland salinity.

Wine tasting and sensory rooms

Uncover the complex relationships associated with grape production, wine composition and wine sensory features. Develop your practical skills by tasting and assessing wines in our purpose-built facility.

Wine laboratories

Perfect your wine analysis techniques in our state-of-the-art laboratories.

“It takes a lot of dedication, but I’m passionate about social work, particularly social justice. I’d love to get into activism and human rights.

“By helping individuals I’ll be able to help communities develop and hopefully contribute to positive social change in the world. There’s a lot of social disadvantage areas I’d like to address. Improve policies and the justice system, focus on big issues like homelessness, progress movements like Black Lives Matter and advocate for the LGBTIQ+ community.

“It’s hard to define social justice, but for me it’s about equity and equality. It can take generations to change ideas and thinking and create a social movement, but I really want to contribute and make the world a better place.”

Montana Gaban, Bachelor of Social Work

 Charles Sturt
University

Allied health and pharmacy

As an allied health professional, you'll help people prevent and manage chronic conditions and recover from injury or illness. We know the words that just caught your eye there: help people. You're nurturing and a natural when it comes to empowering those around you. Put your innate skills to work with a career in the growing health industry.

Charles Sturt University is one of largest health education providers in rural and regional Australia, so wherever you want to make a difference – we have a course to help you get there.

When you study with us, your course will involve so much more than just learning from a textbook. Our world-class facilities mean that you'll have access to state-of-the-art labs, equipment and simulated environments. Here, you'll hone your practical skills. So you'll be job-ready when you graduate.

Allied health professionals make up around 25 per cent of Australia's healthcare workforce. So if you're looking at a career in allied health – it's a smart move. You're always going to be in demand.

Top 10 in Australia for pharmacy grads who get jobs*

The perfect dose.
Study pharmacy with the uni
where 96% of grads land
a job within 4 months
of finishing.

*Good Universities Guide 2020/21

You could work in:

- Case management
- Diagnostic radiography
- Food science and nutrition
- Health science and management
- Nuclear medicine
- Occupational therapy
- Paramedicine
- Pharmacy
- Physiotherapy
- Podiatry
- Radiation therapy

→ csu.edu.au/allied-health

Facilities

Clinical simulation centre

Experience real-world scenarios while you're still in training. Our simulated environments teach you to think on your feet when dealing with an emergency situation.

Community Engagement and Wellness Centre

Here, our occupational therapy, physiotherapy and podiatry students get to work directly with the public – gaining hands-on experience and giving back to the community.

Lab and gym spaces

Build your skills, knowledge and confidence in our anatomy lab and musculoskeletal and neurological rehabilitation gym space. You'll learn all about the human body and have the chance to develop your anatomical knowledge – working with real patients from the start of your degree.

Simulation pharmacy

Practice makes perfect – so working in our simulation pharmacy is the ideal preparation to hit the ground running and be ready for the real-world pharmacy environment.

Join the 28,000 people who have graduated from a Charles Sturt health degree.

55% of Charles Sturt health grads come from rural and regional areas.

Animal and veterinary sciences

Two things set our animal and veterinary science degrees apart from the rest: our reputation and the hands-on learning component of our courses.

Our reputation as a leading animal and vet science educator precedes us. If you want to study animals, you go to Charles Sturt University. And we think that has something to do with our ties to the land. Our courses have a strong regional focus, but you also gain the skills and knowledge to work anywhere in the world.

As a Charles Sturt student, you won't just learn it – you'll live it. Hands-on learning is a way of life for us. Whether you're applying your knowledge in our on-campus facilities or building practical skills through workplace learning, you'll be laying the foundations so you can make your mark when you graduate.

#1
in NSW
for vet science grads
who get jobs*

94.6% of Charles Sturt veterinary
science grads get full-time
jobs within 4 months
of graduating.

*Good Universities Guide 2020/21

You could work in:

- Animal science
- Equine science
- Veterinary science
- Veterinary technology

See page 83 for all animal and
veterinary science courses available
at Charles Sturt.

→ csu.edu.au/vet

Facilities

Equine centre

Both equine science and veterinary science students have the opportunity to experience the equine training and competition centre at Charles Sturt's Wagga Wagga campus. You'll also have access to other facilities, like a high-speed treadmill, large covered horse walker and numerous stables and yards.

On-campus farm

With Charles Sturt, you'll have access to 1400 hectares of prime mixed farming land right at your doorstep. You'll also have the chance to work with on-campus research institutions – so you can gain real-world experience across a range of animal sciences.

National Life Sciences Hub (NaLSH)

Get hands-on and learn the underlying sciences for animal health in our state-of-the-art, purpose-built science facility. You'll have the chance to work in four large research laboratory spaces and have access to world-class equipment from day one.

Veterinary clinical centre

Here, you'll find a modern large animal hospital with operating theatres, an intensive care unit, sophisticated diagnostic facilities, isolation boxes, a reproductive unit and small animal teaching labs.

Veterinary pre-clinical centre

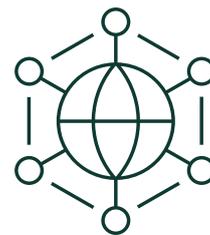

The pre-clinical centre is a hub for teaching veterinary anatomy and physiology, with light-filled, spacious laboratories, tutorial rooms and a veterinary museum. This space also includes a mock consultation room, so you have the chance to develop your communication skills.

Veterinary diagnostic laboratory

Build your practical skills and training by providing veterinary diagnostic services to the region's veterinary community and livestock producers.

Business

Business is the engine room, where you get stuck into what makes people tick and discover the products and services the world needs. So are you ready to take your business plans from the drawing board to the boardroom?

At Charles Sturt University, we're known for being future-focused. And we're known for educating the business leaders of tomorrow. Whether you've got big plans for a small start-up venture or you won't rest until you've landed a job with a Fortune 500 company, our range of business courses will help you hone the creative and analytical skills you need to make it in the business world. When you study business with Charles Sturt, you'll undertake work placements, tap into our networks and get real-world experience at leading organisations like the Australian Taxation Office, Hume Bank and Adecco Australia. We can also help design a unique placement experience that works for you.

On top of that, a business degree from Charles Sturt University can take you anywhere. Literally. You can work in any industry, anywhere in world. From traditional disciplines like accounting, commerce and management, to new areas like healthcare, the arts and not-for-profits – there will always be demand for skilled, passionate grads with big ideas and the confidence to make them a reality.

Christian theology and ministry

When you study theology, you embark on a journey to explore and deepen your faith.

The Bachelor of Theology introduces you to the four main disciplines of theology: biblical studies, church history, systematic theology and practical theology. Our staff are faithful Christians from a variety of traditions, and our student community is diverse and inclusive. In this degree, you'll learn how to respond to contemporary issues including social inequality, environmental degradation, racism, violence, and colonialism through a theological lens.

Examine and expand your faith online or on campus at one of our partner colleges.

- St Barnabas College, Adelaide
- St Francis College, Brisbane
- St Mark's National Theological Centre, Canberra
- United Theological College, North Parramatta

Are you ready to experience a vibrant theological education? You can with Charles Sturt University.

You could work in:

- Chaplaincy
- Christian ministry
- Community work
- Pastoral care
- Religious education

See page 83 for more details about the theology course available at Charles Sturt.

Third year	Judaism and Early Christianity	Hebrews and the General Epistles
	The Triune God	Theological Ethics
	Sacramental Theology	International Study Experience
	The Prophetic Literature	World Religions and Christian Theology

Charles Sturt University courses may be subject to change. For up-to-date course information, please visit study.csu.edu.au/courses

The four areas of theology you'll learn about

Biblical studies

Studying the Old and New Testament will allow you to go behind the words on the page of the Bible and drill down into the original contexts. Taught by experts who are at the forefront of biblical research, this study area will empower you to read and interpret the texts critically and faithfully.

Church history

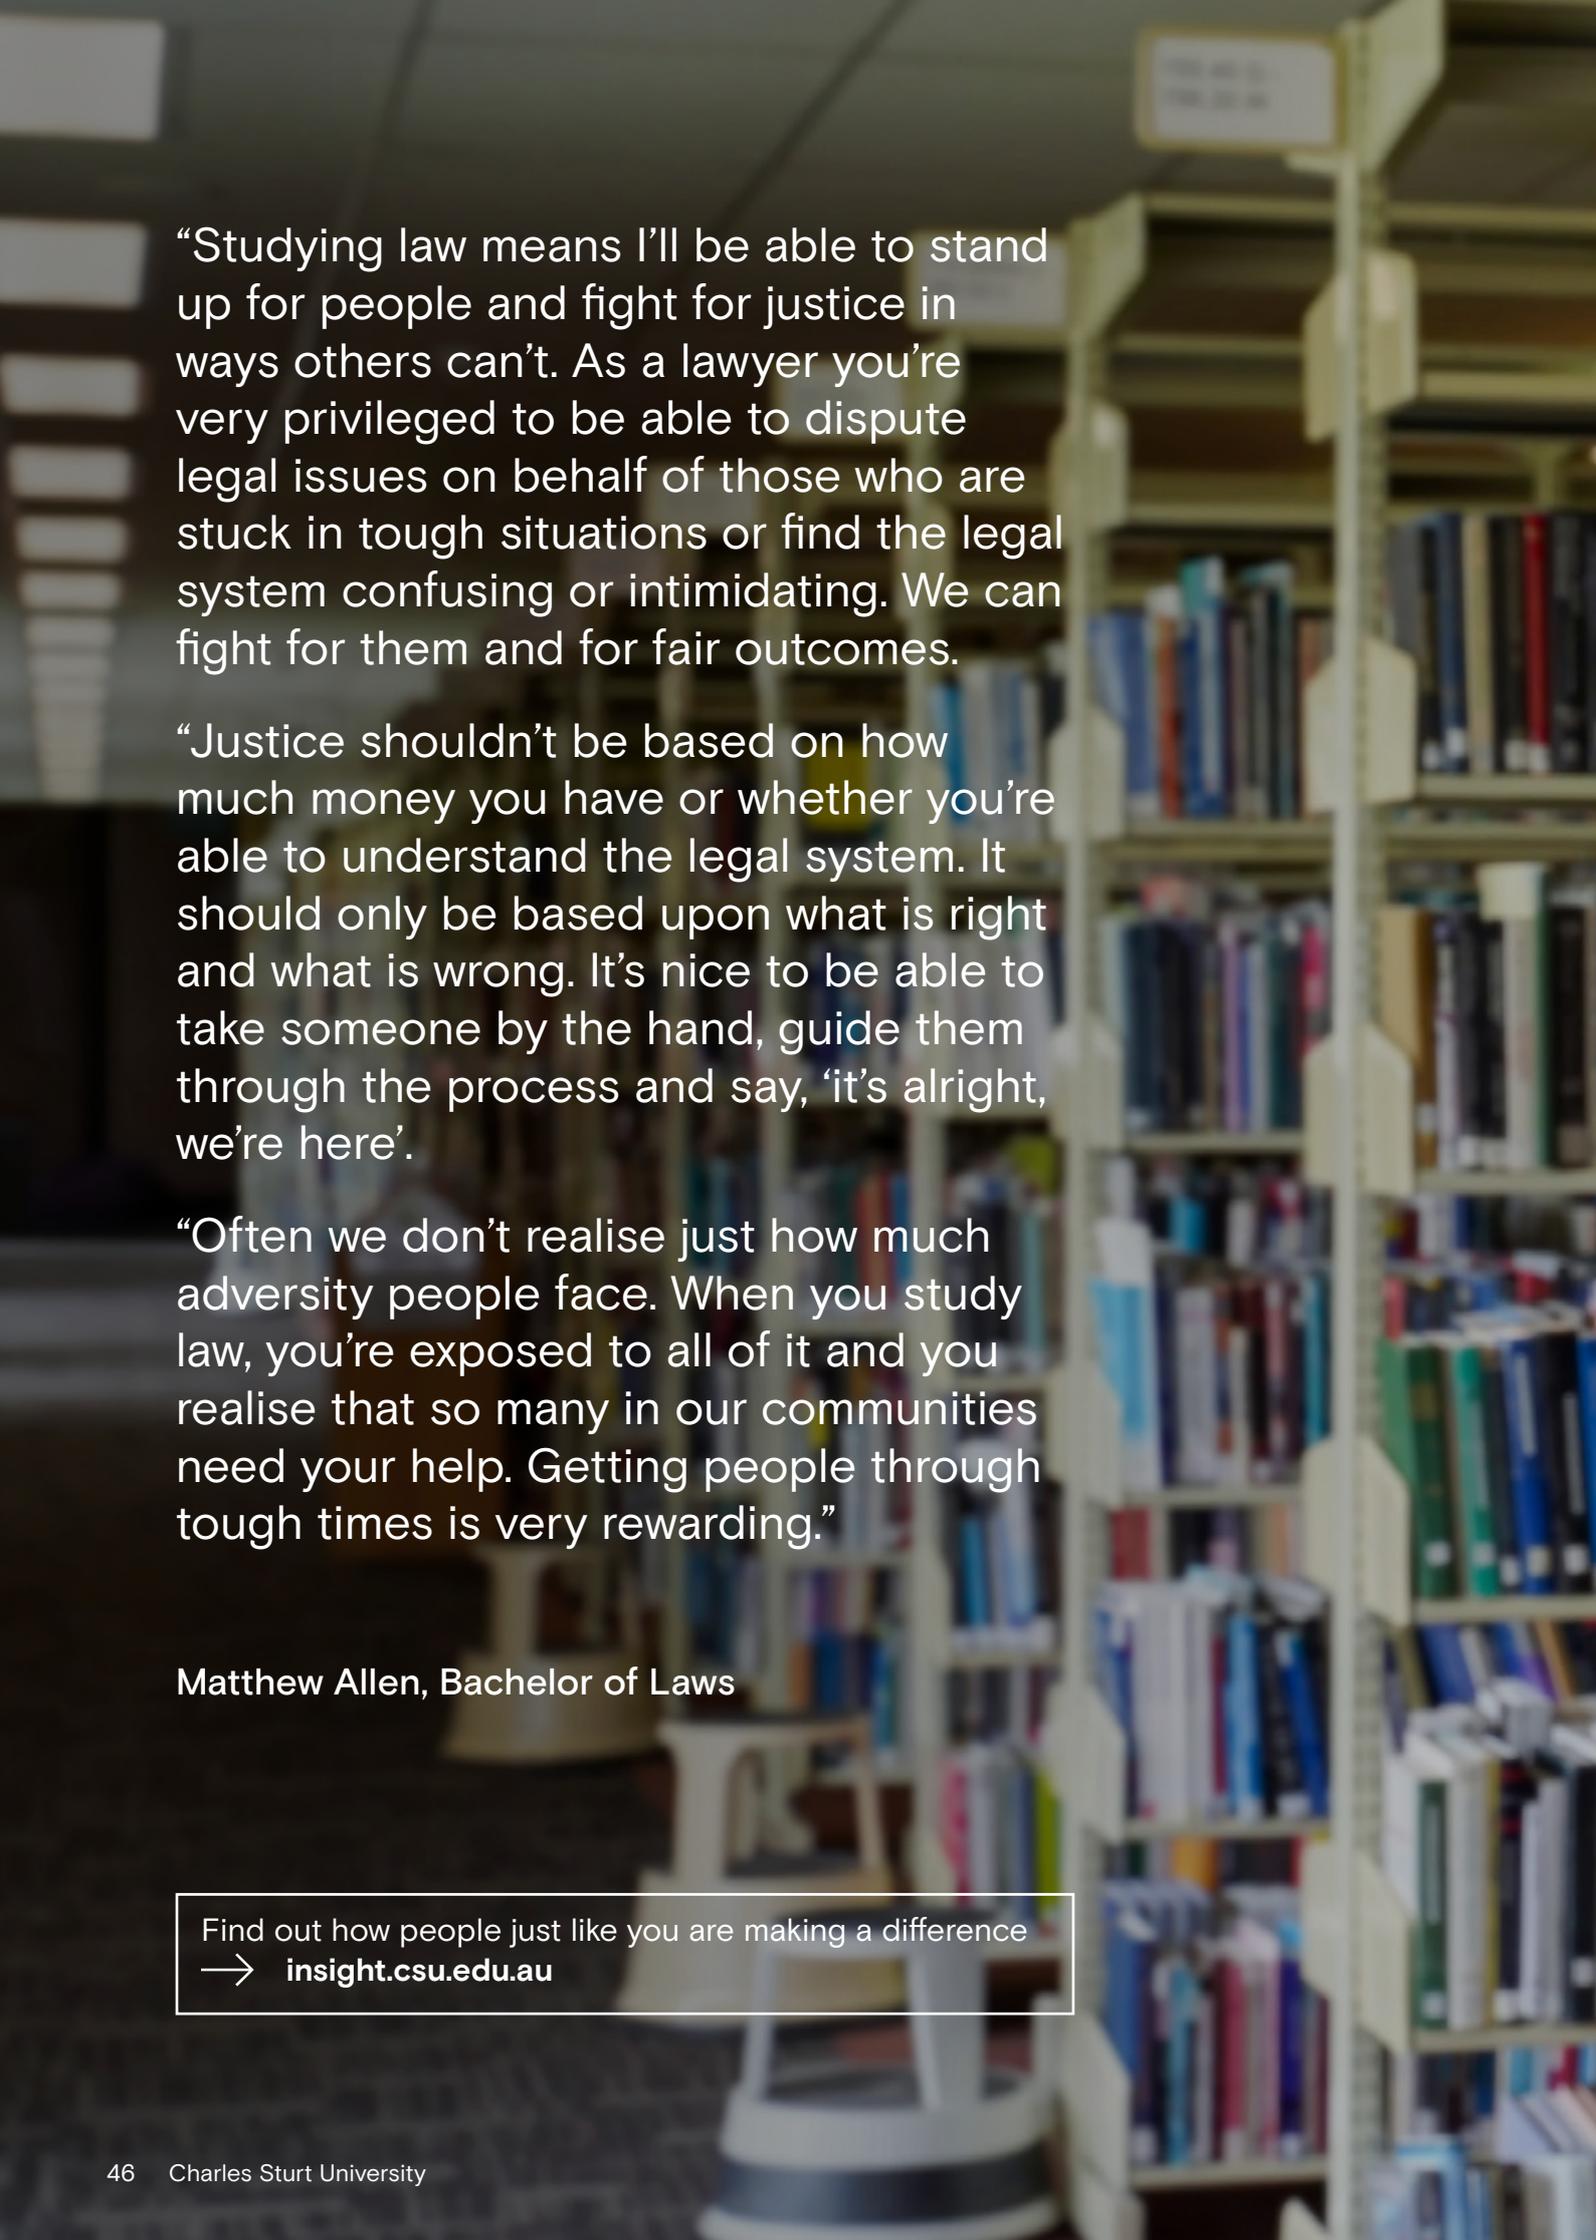

Deepen your understanding of Christianity and the world by studying church history. From the early church to the present day, you'll draw upon the rich legacies of some of the world's greatest thinkers and spiritual leaders to gain an understanding of the roots and reasons for key Christian beliefs and practices.

Systematic theology

This study area seeks to understand the main elements of Christian faith. Questions like, 'how do we understand the Church?' and 'who is Jesus Christ for us today?' Systematic theology allows us to organise our beliefs into a coherent system.

Practical theology

How is Christian theology put into action? How does it engage with culture and society? In many ways, practical theology is where various strands of theological thinking come together. This is where we explore how theology and practice join together.

“Studying law means I’ll be able to stand up for people and fight for justice in ways others can’t. As a lawyer you’re very privileged to be able to dispute legal issues on behalf of those who are stuck in tough situations or find the legal system confusing or intimidating. We can fight for them and for fair outcomes.

“Justice shouldn’t be based on how much money you have or whether you’re able to understand the legal system. It should only be based upon what is right and what is wrong. It’s nice to be able to take someone by the hand, guide them through the process and say, ‘it’s alright, we’re here’.

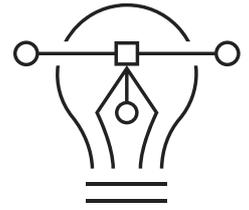

“Often we don’t realise just how much adversity people face. When you study law, you’re exposed to all of it and you realise that so many in our communities need your help. Getting people through tough times is very rewarding.”

Matthew Allen, Bachelor of Laws

Communication

Embrace your originality and make your passion your profession.

Do you dream about the day you get the call to help create the next big Netflix series? Does the thought of working in a bustling advertising or public relations agency give you a serious buzz? Maybe you've got plans to make it big in the world of media.

Well, with Charles Sturt University you can. Here, you'll discover all the ins and outs of the industry. You'll learn how to come up with innovative and exciting ways of bringing stories to life, as well as how to put projects into action. You'll also get plenty of hands-on experience through internships and workplace learning, and in our world-class facilities. So when you graduate, there's no knowledge gap. You'll land on your feet in your first role with confidence.

So, are you ready to shape the stories of the world? On second thoughts, perhaps the real question is: is the world ready for you?

As the world changes, so do we. You want a rewarding, sustainable career; that's why we're always updating our courses. So you'll be ready to make your mark as soon as you graduate. Bookmark csu.edu.au/comm-creative for all the latest info.

→ csu.edu.au/comm-creative

Facilities

Industry-standard performance theatres

Ponton Theatre in Bathurst has tiered seating for 80 audience members, as well as a multichannel lighting system, professional sound mixing system and front-of-house facilities.

Workshop spaces and production studios

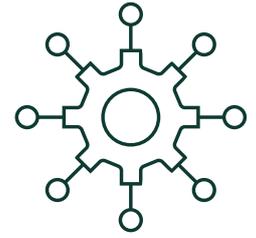

These integrated production facilities give you a dedicated space to work on all aspects of your rehearsal and production process, as well as animation and motion capture studios. We also have professional production studios where you can access industry-standard equipment.

Radio newsrooms

2MCE is our own community radio station based on our Bathurst campus – and it's a place where you learn what it really takes to work in the radio industry. You're given creative control and will create and produce stories, segments and entire programs for broadcast while studying.

Engineering

Imagine rethinking energy distribution to ensure a sustainable future. Imagine developing clean water projects for remote communities. Imagine creating road, rail and airport networks to carry the transport of the future.

Our unique double degree, the Bachelor of Technology (Civil Systems) / Master of Engineering (Civil Systems), will put you at the cutting edge of engineering education – where technological advances meet human ingenuity.

First, you study for a year and a half on campus in Charles Sturt University's award-winning facilities, learning everything from engineering principles to business management. Your learning is project-based: workshops replace lectures, projects replace exams, and our unique and agile Topic Tree replaces session-long subjects.

Then you undertake four one-year paid work placements while studying online, giving you real-world experience and a broad professional network. The best bit? You'll be earning while you're learning. You could be making between \$700 and \$900 a week as a student engineer – depending on your year.

Engineers are changing the world in ways most people never thought possible. They are the solution-builders for tomorrow. Imagine what you could do with an engineering degree...

5-star uni for grad starting salaries*

Our graduates earn an average of \$65,000 when they finish their degree.

Environmental science and outdoor recreation

Have you got big love for this wondrous world? You know, the hug-a-tree-like-you-mean-it kind of love? Turn your passion for the environment and the great outdoors into a rewarding career that really makes a difference.

When it comes to having a positive impact on the environment, we believe in taking action. That's why Charles Sturt University is Australia's first and only certified carbon neutral university.

It's why our environmental courses put sustainability, biodiversity, conservation, wildlife and heritage management at the heart of your learning. And it's why our outdoor recreation course gives you the skills to share our unique environment with others while respecting and protecting natural and cultural environments.

Not only will you be taught by academics whose research is above world standard, you will get to put your learning into practice in some of Australia's most beautiful environments. And when you graduate you could work in some of the world's most incredible locations.

So, where do you want to go?

Charles Sturt is Australia's #2 uni
for climate action*

*Times Higher Education Impact Rankings 2020

Exercise and sports sciences

Do you want to use science to help athletes rise to the top of their game? Or work in sports management to help them maximise their potential? Perhaps you're interested in boosting performance through food and nutrition? Or maybe you see yourself on the ground at high-profile events as a sports journalist? If so, Charles Sturt University has the right course for you.

The Bachelor of Exercise and Sport Science is accredited by Exercise and Sports Science Australia (ESSA), so when you graduate you'll be a qualified exercise scientist, ready to work anywhere in Australia or overseas.

Few courses in Australia provide a skill set as unique as the Bachelor of Sports Media. Your media and communication skills combined with your expert exercise science knowledge will give your reporting a crucial edge.

The best bit about an exercise and sports sciences degree? The facilities – hands down. From well-equipped laboratories to testing facilities (including an exercise physiology and biochemistry lab, neuromuscular testing facility and climate control chamber), you'll learn surrounded by industry-standard equipment that you'll actually be using on the job.

No matter which way you decide to go, with Charles Sturt University you're kicking off a career in the fast-paced exercise and sports sciences industry – and there's no telling how far you'll go.

You could work in:

- Community health programming
- Corporate health
- Exercise physiology
- Exercise science
- Fitness industry
- Food science and nutrition
- Health promotion
- Sports administration and coaching
- Sports journalism
- Sports management

See page 84 for all exercise and sports sciences courses available at Charles Sturt.

How Darcie Morrison combined her love of sport and study

When you study with Charles Sturt University, your opportunities to excel are endless. Darcie Morrison found this out while studying the Bachelor of Exercise and Sport Science.

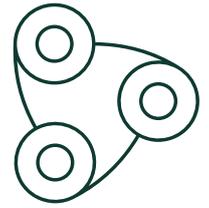

Sport has always been a big part of Darcie's life (and she has the talent to match). So she applied to be part of the Charles Sturt University Elite Athlete Program. This meant she was given plenty of opportunities to combine study and sport – and got a whole lot of support while she was doing it.

"I chose Charles Sturt University because the exercise science degree came highly recommended. The facilities were great – and the personal approach to learning was a game changer. All the labs and pracs I undertook really prepared me to go out into the world and move into my career.

"If there's one moment that stood out as a 'pinch me' moment while studying at Charles Sturt, it would definitely be playing in the Australian Rugby 7s side at the World University Games held in Wales. It was my first overseas trip for sport – and my very first time wearing green and gold. I still get goosebumps when I think about it. It's something I'll never forget."

Humanities, social work and human services

Society. The dictionary says it's 'groups of individuals living in a somewhat ordered fashion'. You know there's more to it though, don't you? When you study humanities, social work and human services with Charles Sturt University, you'll work with people from different backgrounds, solve social problems and empower others.

You can work in the arts, or in areas like case management, individual and family work, child protection, services for older people, disability and rehabilitation, health, community services and corrections. Or you can choose to work with a particular community group, such as children, older people, domestic violence survivors, or those with drug abuse, mental illness or other social problems.

No matter where you decide to take your career, know this: you're giving back. Not only to the people around you, but to the world around you. And that's something you can feel pretty good about.

5-star uni for social work grads who get jobs*

Information and library studies

When it comes to information and library studies, Charles Sturt University is the national leader – hands down. More than half of Australia’s information and library studies students choose to study with us. And there’s a reason for that: we’ve got award-winning teachers and researchers who are so passionate about information (we’re pretty sure they know more than Google!).

In today’s fast-paced world, information is everywhere. Ordering that information – authenticating, categorising and prioritising it – is more important than ever. Studying the Bachelor of Information Studies with Charles Sturt University is where your rewarding career starts.

One of the things that sets this course apart is the flexibility you’re offered when it comes to specialising. You can tailor your degree depending on where you want to take your career. With Charles Sturt University, you’re in the driver’s seat. And we can’t wait to see where your journey takes you.

A shield-shaped infographic on a dark blue background. At the top is a large white '#1'. Below it is the text 'in Australia' in a bold, sans-serif font, followed by 'for graduate employment*' in a smaller font. In the center is a white line-art icon of two hands shaking. Below the icon is the text 'Get qualified and get the job.' followed by '87% of graduates find a job in their field within 4 months of graduation.' At the bottom right of the shield, there is a small white text '*Good Universities Guide 2020/21'.

You could work in:

- Information management
- Librarianship
- Records and archives management

Information technology, computing and mathematics

Technology. It's hard to imagine life without it. In fact, don't even go there, because not only does it already play a huge part in our lives – it's still growing. We've already seen a surge in demand for information technology professionals over the last decade. So are you ready to shape the future?

More than 6000 students of all levels study IT at Charles Sturt University – making us one of the largest IT education providers in the country. And that's because we cover every aspect of the industry.

When you study IT with Charles Sturt University, you're getting a hands-on education taught by academics who know the industry inside out. From systems admin, software design and computer science to cyber security, cloud computing and management – an IT degree from Charles Sturt University places you in the driver's seat of your future... and the future of work.

#1

“The range of courses and specialisations, covering growth areas of the IT industry, allows you to pick just the right course or specialisation to meet your career goals.”

Maumita Bhattacharya
Senior Lecturer in Information Technology

Islamic and Arabic studies

Religion and theology are two of the strongest forces that have shaped history – and continue to influence the world around us.

If Islamic studies is your passion, you've come to the right place. At Charles Sturt, we're known for having the most comprehensive accredited Islamic studies course in the country.

The Bachelor of Islamic Studies is delivered online in collaboration with the Islamic Sciences and Research Academy of Australia – home to some of the most respected scholars from the Australian Muslim community. As you study with us, you'll enrich yourself with Islamic knowledge, cultivate your Islamic understanding and make a real difference in the world with the knowledge you gain.

Are you ready to explore the historical and modern expressions of Islam?

You could work in:

- Academia (with further study)
- Consultancy
- International relations
- Islamic chaplaincy
- Islamic education
- Pastoral care
- Teaching (with further study)
- Enhance your career in other professions, including government work; Islamic finance adviser; law, defence and policing; or psychology and social work

See page 85 for more details about the Islamic and Arabic studies course available at Charles Sturt.

The role of Charles Sturt's Centre for Islamic Studies and Civilisation

The centre is a collaboration between Charles Sturt University and the Islamic Sciences and Research Academy of Australia. The centre was the first of its kind in Australia; its founder was Associate Professor Mehmet Ozalp.

"In the 2000s I saw a need to provide educational information services on Islam and Muslims for the general public. At the same time, I was arguing that one of the ways to address and prevent issues within the Muslim community was to provide Muslims in Australia the opportunity to study Islam at the university level without having to go overseas.

"Of course, it was not the only contribution and rather a longer-term solution. But it's one which has seen more than 1600 students undertake our courses during the last 10 years.

"I'm a person who wants to try and change the world for the better. I will do something – even if there is no guarantee that I'll succeed. And that gives meaning and purpose to my life."

Medical science and dentistry

Charles Sturt University is a leader in rural and regional health. We've earned a reputation for producing some of the best medical and health sciences, dentistry and oral health therapy grads in Australia. They're innovative, highly skilled and committed. Are you ready to be one of them?

Our courses combine essential knowledge with cutting-edge techniques, and all taught in our modern practical learning facilities.

We also provide public dental and medical services across many of our campuses. So while you're studying, you'll get the chance to work with real patients, performing real procedures. On top of that, you'll be getting the inside scoop on how medical businesses are actually run. So when you land your dream job after graduation, you're already 100 per cent comfortable working in clinical settings.

It's time to focus on your future. A future of countless possibilities and exciting opportunities. Let's do it.

#1
in NSW
for dentistry grads
who get jobs*

Smile.

91% of our dentistry grads
find full-time work within

Facilities

Dental and oral health clinics

Located on the Albury-Wodonga, Bathurst, Dubbo, Orange and Wagga Wagga campuses, these clinics are where you'll put theory into practice throughout your course. The dental and oral health clinics are your essential hands-on workspaces, where you'll transition from simulated learning to real-world clinical practice. The best bit? You'll start seeing real patients from your second year of study!

Dental simulation clinic

Hone your clinical skills in our simulation clinic using our state-of-the-art dental equipment – just like the ones they use in industry. So when we say simulation, we mean it. It will feel like you're treating a real patient, so you'll be developing your precise motor skills as you learn.

Dental technology laboratory

Learn all about dental prosthetics and dental material science in our dental technology laboratory. You'll construct appliances like dentures, occlusal splints and mouthguards for your patients – and reap the rewards of making a real difference in the lives of others.

Human anatomy facilities

Get to grips (literally) with anatomical simulations of the skeletal, muscular, vascular and nervous systems of the human body.

Medical radiation science laboratories

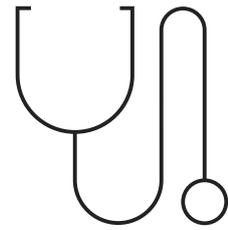

Gain experience using the very same equipment that you'll find when you step into your next job. From digital radiography systems and gamma radiation cameras, to 3D simulation software, get practical knowledge to illuminate your learning.

National Life and Sciences Hub (NaLSH)

Conduct diagnostic tests in our dedicated anatomy and physiology labs.

Medicine

Rural and regional Australia needs more doctors. The continuing shortage of doctors in these areas is central to Australia's rural health crisis.

Now you can be part of the solution. Charles Sturt University and Western Sydney University School of Medicine have partnered to create the Joint Program in Medicine. It's a five-year undergraduate entry Doctor of Medicine based in Orange, NSW. So you can start preparing for your career in medicine, right here in the regions.

We've just cut the ribbon on our brand new medical facilities – and you could be part of the next cohort of student doctors to cross the threshold.

We want to give you the best chance of success in following your dreams. So if you're from a rural or regional area, you could be eligible for a lower ATAR through the rural entry admission scheme. There are also specialised pathways for Aboriginal and Torres Strait Islander applicants and dedicated medicine scholarships available. We'll be hosting medicine information evenings in 2021 – jump online to find out more.

You can change the world of rural health with Charles Sturt.

Australian Government

Murray-Darling
Medical Schools Network

Keen to apply?

Applications open through UAC in August 2021 and close in September. Classes start in 2022.

You'll also need to complete the University Clinical Aptitude Test for Australia and New Zealand (UCAT ANZ) as part of your application. UCAT ANZ registrations open in March 2021.

You could work in:

- Emergency medicine
- General practice (rural or metropolitan)
- Medical education
- Medical research
- Public health
- Specialist medicine

See page 85 for more details about the medicine course available at Charles Sturt.

→ csu.edu.au/medicine

Facilities

Academic hub (featuring research and support facilities)

Anatomy teaching laboratory

Clinical Skills Learning Centre (opposite Orange Hospital)

Clinical skills rooms

Collaborative learning spaces

Interactive study pods

Mock hospital ward

Problem-based learning rooms

Ultrasound room

The unique joys of working as a rural doctor

Meet Dr Sandra Mendel. She's been studying, training and working in the regions for more than 20 years and is the Year 2 Coordinator Medicine at the Charles Sturt School of Rural Medicine.

"The best part of my job is that I can make a difference in someone's life. It might only be a small snapshot of five minutes a day, but I can make a difference. I've developed some lovely friendships with my patients over the last 20 years. I've been part of delivering some of their children, and then looked after their mums or dads when they have passed away. That's a really special thing.

"I'm so excited to be able to repay some of the lovely things that happened to me as a medical student and junior doctor; to be able to craft some of that in some young, rural students – and give them the same opportunity."

“Being a nurse, I’ll get to work with and meet many different people. During any shift, the work is so diverse and that appeals to me.

“The human body has always been interesting – how it heals and works under different circumstances. What it can do is really amazing.

“Being the right type of nurse can make the world of difference. When people are at their most vulnerable, they don’t want to be seen as a fragile, sick person. They want a carer who can see their qualities. Who knows what makes you, you.

“I want to be a nurse who looks beyond a person’s illness and sees their potential, sees the whole person. Help them use their skills and strengths to get back to their full capacity, living their best lives. When someone leaves hospital and you’ve worked with them to achieve their goals – the feeling at that moment is real happiness.”

Niamh Hirekodi, Bachelor of Nursing

Find out how people just like you are making a difference

Nursing, midwifery and Indigenous health

Nurses are the backbone of our healthcare industry. And at Charles Sturt University, we're known for our caring and professional nursing grads.

Employers consider our nursing program one of the best in the country (maybe because we've been around for 40 years) – and we take great pride in educating the carers of tomorrow. You can join the 10,000 nursing and midwifery graduates who are making a difference in their communities.

The best bit? You'll be getting hands-on, helping real people in the community, from your first year. Work placements. Practical learning. Industry connections. These experiences will help you learn everything you need to know, giving you confidence and setting you up for success in the workplace.

And when you study with Charles Sturt, you'll get a nationally accredited degree and become qualified to work anywhere in Australia (or around the world). It's a smart move. Because you'll be in demand, earning a decent salary and actively creating a world worth living in.

Become a registered nurse. Become the heart of healthcare.

You could work in:

- Aged care
- Ambulatory care
- Chronic care
- Community health
- Critical care and emergency
- Disability and rehabilitation
- Health services management
- Indigenous health
- Mental health
- Perinatal care
- Preoperative services and surgery
- Private and public healthcare

See page 85 for more details about the nursing, midwifery and Indigenous health course available at Charles Sturt.

Make a real difference: from refugee to nurse

There's no dream too big. And no hurdles that can't be overcome. Want proof? Former refugee Ali Abbas Haidari wanted to make a difference in the world. Ali was born in Afghanistan and was only four years old when Taliban persecution forced his family to flee their home.

"My family and I decided to search for a safer place for me to live, with better opportunities. I came to Australia by boat. Then I spent five months in a detention centre."

Ali settled in western Sydney and worked hard to improve his English language skills – which would eventually help him get into uni.

"I was very passionate about getting into university and studying a Bachelor of Nursing. I was interested to know more about the human body, and people's health and wellbeing. And I wanted to help people – others who were in need."

Ali completed his degree in three years, which was made easier with a full-ride scholarship and support from Charles Sturt every step of the way.

"Charles Sturt is an amazing university with beautiful environments where you can study. And I received a lot of support that allowed me to successfully graduate. There were so many very supportive and kind-hearted teachers, lecturers and staff members."

And Ali's career got off to a flying start when he received an award from the South Eastern Sydney Local Health District for his work with mental health and dementia patients. He's realised his dream and is already helping create a world worth living in.

"I was very passionate about getting into university and studying a Bachelor of Nursing. I was interested to know more about the human body, and people's health and wellbeing. And I wanted to help people – others who were in need."

Ali Abbas Haidari
Bachelor of Nursing

Policing, law, security, customs and emergency management

Do you see yourself on the frontline? Maybe it's the frontline of justice, advocating for those who have been wronged. Or perhaps it's the frontline as a police officer, protecting and serving our communities. Wherever you see yourself, your training with Charles Sturt University will prepare you to tackle the world's problems – head on.

We're recognised as a global leader in research and education for professionals in law enforcement, investigations, counter-terrorism, emergency management, law, leadership and security. Our close industry connections to local, national and global organisations mean that you're learning best practice – from the best in the business.

Get on the front foot – for your career on the frontline.

Psychology

Do you have an inquiring mind? Are you patient and perceptive? Can you look at people and their problems through a neutral, but empathic lens? Well, psychology may be the right career for you.

With Charles Sturt University, you'll explore the potential of the human mind. You'll study how people learn, think, perceive and interact with the world around them. You'll examine the experiences of others in their past and their present. And help them build a brighter future.

So with Charles Sturt University, you can set yourself up for a fulfilling life. You'll be working in an interesting field and you'll be helping others. You'll hit that job-life sweet spot.

There are plenty of avenues for you to explore with an undergrad psychology degree. Think counselling or human services, as well as marketing and human resources. Your options are endless.

“I started out studying marketing and that lead me towards what I guess you’d call event management. From there I found myself researching how we organise LGBTIQA+ Pride events in rural communities.

“During my research I saw the impact these experiences had on people’s lives. So, I’ve developed a sort of toolkit for people wanting to organise these events and I’m hoping my work will help make people’s lives a little bit easier. More events mean greater visibility and hopefully greater community acceptance. Even if just one person in a country town could feel more comfortable with their identity – that would be amazing.

“I want to be the best ally for the LBGTIQA+ community. I live in the country, have friends who are part of the community and know people’s stories. They are isolated, lonely and feel like they don’t belong. People are scared to live their authentic lives. Why wouldn’t I want to help?”

Olive Lockett, Bachelor of Business (Honours)

Find out how people just like you are making a difference

Science

When you look around you, what do you see? Do you see the big issues facing the world – and ways to fix them? Medical breakthroughs, space exploration, food production, clean energy, robotics – the solutions we need are all rooted in science.

Over the next 10 years, 75 per cent of jobs in the fastest-growing industries will need skills in science, technology, engineering, mathematics and medicine (otherwise known as STEMM). So when it comes to job security into the future, a science degree is a smart choice.

And when it comes to picking a career path, your options are endless. You can major in analytical chemistry, biology, earth science, mathematics or physics.

The other drawcard to a science degree? The facilities and workplace learning opportunities we offer are top notch. You'll experience residential schools at the National Life Sciences Hub (NaLSH), our purpose-built, integrated science hub, and have the chance to work in on-campus industry labs, like the Department of Primary Industries Environmental and Analytical Laboratories.

Do you want to be part of the change? Change your life. Change the world around you. Change the course of history.

Teaching and education

Educating the future minds of tomorrow. It's a big responsibility – but it's one of the most rewarding careers out there. From helping a student or child get to that 'light bulb' moment, to supporting a student through a personal issue, a teaching career is filled with special moments.

Whether you want to teach early childhood, primary, secondary or adult and vocational education, a degree from Charles Sturt University means that you'll graduate confident, skilled and excited to inspire others.

You'll have lots of opportunities for professional workplace learning. So by the time you've graduated, you'll have spent plenty of time in real classrooms, delivering real lessons. You'll be a pro. And you'll be 100 per cent ready to help your students reach their full potential.

“Being a mum of two and studying full-time – it can be a bit of a juggle. But I've had lots of support during my time at Charles Sturt. The class sizes are small, so you really get to know your classmates. Your lecturers know you by name and they're very approachable.”

Beth Higgins
Bachelor of Education
(Early Childhood and Primary)

Balancing study and motherhood: Beth's story

Beth Higgins always knew she wanted to be a teacher. She loves children – and she's passionate about the benefits of early childhood education. She came to Charles Sturt ready to kick start her career and get qualified for the job.

“Being a mum of two and studying full-time – it can be a bit of a juggle. But I've had lots of support during my time at Charles Sturt. The class sizes are small, so you really get to know your classmates. Your lecturers know you by name and they're very approachable.”

Balancing study and motherhood was tough at times, but it didn't stop Beth from excelling at her studies.

“A highlight of the course for me was making the Executive Dean's list [for academic excellence]. It's given me extra motivation to keep going and continue putting in my very best effort. I have grown in confidence and I've made some really awesome friends. I'm getting so much out of this course. So if you're thinking about applying for this degree, just go for it. You have nothing to lose.”

Our courses

Right, ready to get to work? Our courses range across almost every industry, and every one is packed full of the latest knowledge, ideas and skills. So if you're ready to help create a world worth living in, we've got the course to help you do it.

We also offer a range of Honours degrees. Honours involves an extra year of study that allows you to undertake a research project. You can take an Honours year following on from your bachelor's or as a standalone if you already have an undergraduate degree.

Search "Honours" at study.csu.edu.au/courses

Okay, I'm ready to apply

Applying through UAC or VTAC

If you're coming to uni from high school and planning to study on campus with us, you'll apply through a tertiary admissions centre (UAC or VTAC).

But what does that actually look like?

1. Pick your top courses and load them into UAC or VTAC.
2. Study hard and sit your Year 12 exams.
3. Your results will be used to determine if you've been successful in getting into your top course.
4. If not, UAC or VTAC will move down your preference list, offering you a place in your next eligible course.
5. The clincher: you'll have the opportunity to change your preferences at different points (also known as offer rounds) – so there are plenty of chances for you to land your dream course.

Feel free to reach out to our friendly student adviser team if you need help at any point with the application process.

Applying direct to Charles Sturt

If you're coming to uni from the workforce or you're planning on studying online, you'll apply direct to Charles Sturt University. It's super simple – you can apply online in 15 minutes.

Hot tip: make sure you pull together any supporting documentation before you begin your application. That's things like transcripts, your résumé or any other forms that will support your application.

Your Charles Sturt application checklist.

- Choose your course.
- Check the following on the course website.
 - Admission info
 - Additional entry requirements (like an additional application form, portfolio of work or interview)
 - English language requirements
- Apply online.
- Accept your offer.
- Sort out your finances.
- Apply for scholarships.
- Apply to live on campus (if you're studying on campus).
- Start your course!

→ study.csu.edu.au/apply

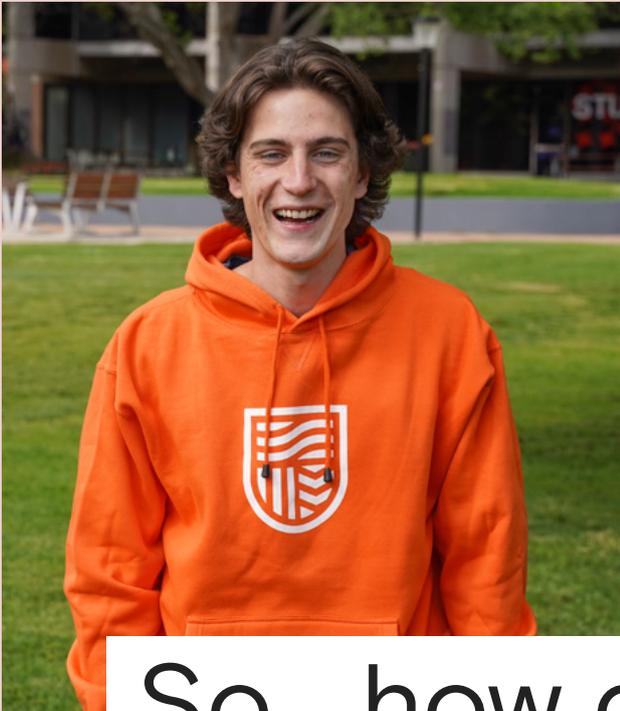

Session intakes

When you're ready, we're ready. We have lots of session intakes throughout the year, so you can start studying when it suits you. Depending on your course, you can start studying in:

- March
- July
- November

And some courses have even more start dates across the year – check out all the options at study.csu.edu.au/courses

So... how did we do?

At Charles Sturt University, we strive to bring you the most relevant information about starting your uni journey. From courses and career paths, to living on campus and our facilities – we hope you found everything you need.

So, how did we do? Take our short survey and let us know what you thought of the 2022 undergraduate guide. It only takes five minutes and you'll go in the draw to win a Charles Sturt hoodie.

→ [Start survey](#)

Let's get together

Open Day

We're a friendly bunch here at Charles Sturt University. Helping our future grads get comfy with life as a uni student is important to us. That's why you're invited to Open Day!

- Albury-Wodonga – Sunday 15 August
- Bathurst – Sunday 22 August
- Dubbo – Saturday 4 September
- Orange – Sunday 29 August
- Port Macquarie – Sunday 1 August
- Wagga Wagga – Sunday 8 August
